In the *Cell Types* Gizmo, you will use a light microscope to compare and contrast different samples. On the LANDSCAPE tab, click on the ***Eelodea* leaf**. (Turn on **Show all samples** if you can't find it.) Switch to the MICROSCOPE tab to observe the sample as it would appear under the microscope. By default, this microscope is using 40x magnification.

1. Drag the **Coarse focus** slider until the sample is focused as well as possible. Then, improve the focus with the **Fine focus** slider. What do you see? I see a lot of cells grouped together.
2. Select the 400x magnification. If necessary, adjust the fine focus. Now, what do you see? I see one cell and I can also see green things in and on it.

The individual chambers you see are **cells**, the smallest functional unit of an organism.
