

A top-down view of a workspace. In the center, a person's hands are visible; one hand is holding a white tablet, and the other is pointing at the screen with a pen. The tablet displays a dark interface with a grid pattern. To the left of the tablet is a silver laptop with a black keyboard. Above the laptop is a white notebook with a wooden cover. To the right of the laptop is a pair of glasses. In the bottom right corner, there are some papers with technical drawings or diagrams. The overall scene suggests a collaborative work environment focused on technology and documentation.

Peter Norton's Introduction to Computers Peter Norton,1999

Programming by Design David L. Johnson,1996 Programming by Design provides the basis for a course in computer programming concepts and techniques Covering structured design and coding GUI application development and an introduction to object oriented programming concepts It takes a language independent design oriented approach to the teaching of programming Rather than rely on a specific programming language it aims at building attitudes and skills that will allow students to tackle and successfully apply any programming or database language The philosophy of the text is that the student will develop transferable programming design and language learning skills rather than repetitively learning a specific programming language
