Let's Talk About Varsity, 2009 Perspectives on Student Affairs in South Africa McGlory Speckman, Martin Mandew, 2014-07-17 The goal of *Perspectives on Student Affairs in South Africa* is to generate interest in student affairs in South Africa. The papers contained herein are based on best practice local experience and well researched international and local theories. The papers in this book deal with matters pertaining to international and national trends in student affairs, academic development, access and retention, counselling and material support for students coming from disadvantaged backgrounds. They are linked to national and international developments as described in the first two papers. This publication will assist both young and experienced practitioners as they grow into their task of developing the students entrusted to them. All contributors are South Africans with a great deal of experience in student affairs and all are committed to the advancement of student affairs in South Africa. The editors are former heads of student affairs portfolios at two leading South African universities.

Fees Must Fall Susan Booysen, 2016-10-01 This book explores the student discontent a year after the start of the 2015 South African FeesMustFall revolt. FeesMustFall, the student revolt that began in October 2015, was an uprising against lack of access to and financial exclusion from higher education in South Africa. More broadly, it radically questioned the socio-political dispensation resulting from the 1994 social pact between big business, the ruling elite and the liberation movement. The 2015 revolt links to national and international youth struggles of the recent past and is informed by black consciousness politics and social movements of the international left. Yet its objectives are more complex than those of earlier struggles. The student movement has challenged the hierarchical top-down leadership system of university management and its double-speak of professing to act in workers and students' interests yet entrenching a regressive system for control and governance. University managements, while on one level amenable to change, have also co-opted students into their ranks to create co-responsibility for the highly bureaucratised university financial aid that stands in the way of their social revolution. This book maps the contours of student discontent a year after the start of the FeesMustFall revolt. Student voices dissect colonialism, improper compromises by the founders of democratic South Africa, feminism, worker rights and meaningful education. In-depth assessments by prominent scholars reflect on the complexities of student activism, its impact on national and university governance, and offer provocative analyses of the power of the revolt.

Social Justice and Education in the 21st Century Willie Pearson Jr., Vijay Reddy, 2021-04-10 The world is not an equal place. There are high and low income countries and high and low income households. For each group, there are differential educational opportunities leading to differential educational outcomes and differential labor market opportunities. This pattern often reproduces the privileges and inequalities of groups in a society. This book explores this differentiation in education from a social justice lens. Comparing the United States and South Africa, this book analyzes each country's developmental thinking on education from human capital and human rights approaches in both primary and higher education. Choice Architecture Versus Price Xiaoling Ang,2016 We show that changes in choice architecture have a large effect on student loan decisions while we do not find significant effects of sizeable interest rate changes We evaluate the effect of two policies implemented in 2010 by the U S Department of Education 1 the requirement that all applicants for private student loans fill out a Self Certification Form which includes various disclosures about federal aid and 2 the prohibition of presenting a private student loan as a default option on a financial aid offer without

disclosure of the relationship between the school and the creditor Using difference and difference and matching techniques on a proprietary dataset of private student loan originations from the Consumer Financial Protection Bureau and survey and administrative data from the Department of Education we show that these changes decreased private student loan originations by 33% at public four year institutions 18% at private not for profit four year institutions and 55% at four year for profit institutions In contrast we find no consumer response when analyzing 60 basis point decrease in the price of federal Parental PLUS loans at some schools using same datasets and similar estimation techniques Federal Student Loan Programs United States.
