

## Study Guide Digestive System

---

1. **Digestion** – is breakdown of complex food molecules like starch into smaller molecules like glucose that can pass through the cell membranes of intestine and get absorbed into blood.
2. **Digestive system** has 2 main components. A) Alimentary canal B) Associated organs – teeth, tongue, salivary glands, liver and pancreas. **Fig 16.1** records the structure and function of each part. Remember them.
3. **Histology of alimentary canal fig 16.2:** is formed of 4 major parts. Starting from outside to inner side:-
4. **Serosa** : or serous membrane is formed of Squamous epithelium and a small amount of connective tissue.

**Muscularis Externa:** is formed of external longitudinal and inner circular smooth muscles.

**Submucosa:** is areolar connective tissue having blood and lymphatic vessels in it.

**Mucosa:** or mucous membrane is formed of 3 parts. A) muscularis is a thin layer of smooth muscles. B) Lamina propria is a small amount of areolar connective tissue. C) Epithelium is mostly simple columnar. It helps in secretion and absorption.

**Alimentary Canal:** is a long coiled tube starting with mouth and ending at anus.

5. **Mouth = oral cavity = buccal cavity** – is outlined by lips – anterior; cheeks – lateral; tongue inferior; palate - superior. Tongue lies at the floor of oral cavity. Mouth is continuous with posterior oropharynx. Anterior roof of oral cavity is Hard Palate formed of bones – palatine processes of maxilla and palatines. Fig 16.4
6. **Chewing = Mastication:** as we put food into mouth teeth cut it and grind into smaller morsels. Tongue moves food around and mixes saliva to soften and bind food. Mastication has dual voluntary and involuntary control. It means we can chew food by conscious effort = voluntary or by reflex action = involuntary.
7. **Pharynx** – is the throat. Soft Palate forms the roof. It lacks any bone support. Its posterior part hangs freely, the Uvula. It has 3 parts. A) nasopharynx B) oropharynx C) laryngopharynx.
8. **Nasopharynx:** nasopharynx is superior pharynx continuous with nasal cavity. **Pharyngeal tonsils and tubal tonsils** do not allow microorganisms to pharyngotympanic = internal auditory tubes that open into nasopharynx. Food does not enter nasopharynx.
9. **Oropharynx** is the middle pharynx and is posterior continuity of mouth. Air and food cross their paths in it. **Palatine and lingual tonsils** lie in this part.
10. **Laryngopharynx** is inferior pharynx and larynx and esophagus open into it.
