China from the 1911 Revolution to Liberation Jean Chesneaux, Françoise Le Barbier, Marie-Claire Bergère, 1977

Making Of An Economic Superpower, The: Unlocking China's Secret Of Rapid Industrialization Yi

Wen, 2016-05-13 The rise of China is no doubt one of the most important events in world economic history since the Industrial Revolution. Mainstream economics, especially the institutional theory of economic development based on a dichotomy of extractive vs inclusive political institutions, is highly inadequate in explaining China's rise. This book argues that only a radical reinterpretation of the history of the Industrial Revolution and the rise of the West, as incorrectly portrayed by the institutional theory, can fully explain China's growth miracle and why the determined rise of China is unstoppable despite its current backward financial system and political institutions. Conversely, China's spectacular and rapid transformation from an impoverished agrarian society to a formidable industrial superpower sheds considerable light on the fundamental shortcomings of the institutional theory and mainstream blackboard economic models and provides more accurate reevaluations of historical episodes such as Africa's enduring poverty trap despite radical political and economic reforms, Latin America's lost decades and frequent debt crises, 19th century Europe's great escape from the Malthusian trap, and the Industrial Revolution itself.

The Encyclopedia of Political Revolutions Jack A. Goldstone, 2015-04-29 The Encyclopedia of Political Revolutions is an important reference work that describes revolutionary events that have affected and often changed the course of history. Suitable for students and interested lay readers yet authoritative enough for scholars, its 200 articles by leading scholars from around the world provide quick answers to specific questions as well as in-depth treatment of events and trends accompanying revolutions. Includes descriptions of specific revolutions, important revolutionary figures, and major revolutionary themes such as communism and socialism, ideology, and nationalism. Illustrative material consists of photographs, detailed maps, and a timeline of revolutions.

The Tragedy of Liberation Frank Dikötter, 2013-09-24 A groundbreaking chronicle of the violent early years of the People's Republic of China by the author of the BBC Samuel Johnson Prize-winning *Mao's Great Famine*. The Chinese Communist party refers to its victory in 1949 as a liberation. In China, the story of liberation and the revolution that followed is not one of peace, liberty, and justice. It is first and foremost a story of calculated terror and systematic violence. So begins Frank Dikötter's stunning and revelatory chronicle of Mao Zedong's ascension and campaign to transform the Chinese into what the party called New People. Following the defeat of Chiang Kai-shek in 1949 after a bloody civil war, Mao hoisted the red flag over Beijing's Forbidden City, and the world watched as the Communist revolution began to wash away the old order. Due to the secrecy surrounding the country's records, little has been known before now about the eight years that followed, preceding the massive famine and Great Leap Forward. Drawing on hundreds of previously classified documents, secret police reports, unexpurgated versions of leadership speeches, eyewitness accounts of those who survived, and more, *The Tragedy of Liberation* bears witness to a shocking, largely untold history.

Interweaving stories of ordinary citizens with tales of the brutal politics of Mao's court Frank Dikötter illuminates those who shaped the liberation and the horrific policies they implemented in the name of progress People of all walks of life were caught up in the tragedy that unfolded and whether or not they supported the revolution all of them were asked to write confessions denounce their friends and answer queries about their political reliability One victim of thought reform called it a carefully cultivated Auschwitz of the mind Told with great narrative sweep **The Tragedy of Liberation** is a powerful and important document giving voice at last to the millions who were lost and casting new light on the foundations of one of the most powerful regimes of the twenty first century **Routledge Library Editions: China Under Mao** Various, 2021-06-23

This 13 volume collection of previously out of print titles reissues some key works in the study of Mao Zedong's huge influence on China its politics economics and development into the power that it is today Foreign policy the Cultural Revolution the fate of opponents Chinese Marxist thought all are covered here and more in this essential reference resource

Index to Selected Works of Mao Tse-tung and Selected Military Writings of Mao Tse-tung You lian yan jiu suo (Kowloon, China), 1968 **The China Reader: Communist China: revolutionary reconstruction and international confrontation; 1949 to the present** Franz Schurmann, Orville Schell, 1967 **History of Asia** B.V. Rao, The importance of the study of the history of Asia needs no special emphasis particularly with the emergence of Japan China and India as major powers of this continent The present book History of Asia is different from other books of this genre as it connects the ancient and medieval with the modern It deals with the account of each country in its geographical setting highlighting those incidents in neighbouring countries which have had some impact upon it The ancient and medieval periods cover topics like migration early settlements formation of kingdoms and empires socio economic matters Islamic penetrations and the advent

of Western powers The modern period is treated in great detail especially matters like colonisation impact of Western civilization the rise of nationalism and the gaining of independence following the Second World War Current history which includes aspects like subversion of democracies the ushering in of military rule ethnic conflicts movements for the restoration of democracy oppression of minorities economic issues and the possibility of nuclear war right up to the end of the millennium has been dealt with in a fascinating way with maps and a bibliography to stimulate the reader's interest
