- Unique 5 tn capacity forklift concept with high added value capable of working under extreme conditions in all kinds of terrains and also on mixed surfaces for semi-industrial use. Compact size forklift with high stability in difficult terrains that achieves high performance in tough tasks in diverse surroundings where a great productivity and safety of operations is demanded.

- Functional forklift with exclusive design: Great diameter forklift wheels permit great chassis ground clearance and optimal cargo stability on forks to minimize the possibility of cargo falling when working on uneven and different grounds under intensive task. Forklift with a high operational safety and excellent dynamic stability that generates high productivity in material handling.

- High technology forklift equipped with progressive hydrostatic trandmission, low consumption and low noise KUBOTA engine, AUSA differential axles with epicicloidal wheel reduction, exclusive and reliable on-demand 4x2/4x4 FullGripBSystem, integral and tilting closed cabin, fully-integrated functions joystick for a total control of operation.

- Low weight forklift equitatively distributed between both axles too achieve a minimum soil erosion and compactation while permitting its use in soils with low resistance to weight. Its low weight contributes to a low consumption in comparison with other rough terrain forklifts of its category. Great width and flotation tires distribute weight uniformly on the ground therefore reducing the risk of pavement break.

- Low total height forklift (2.2 m) and reduced width (1.8-2.0 m). These are suitable measurements to work under high safety standards and effectiveness under limited height and space areas. Driver's position is located at low level which facilitates access while reducing fatige.

- Optimal forklift for tasks where steep ramps need to be surpassed, or in very irregular grounds, also when bumps, curbs or slippery and dirty gradients are found (mud, sand, gravel, ice, snow, humidity, rails, dust, grease, oil, leaves, grass, painted signs, etc). Counterweight of great dimension and advanced design permits high stability at full load capacity for increased safety.

- High performance forklift adequate for working with push and pull attachments such as clamps, buckets, and now plugs thanks to its high driveability that is achieved thanks to its hydrostatic transmission in combination with its exclusive on-demand "FullGripBSystem", by means multiple discs with electro-hidraulic engagement with push button from joystick.

- Forklift specification according to task (Rough terrain or Industrial): R/ Models for rough terrain use (standard EN 1726-1 Ac) with load chart for uneven soil applicabilities. RI/ Version (optional) for semi-industrial use (standard N 1726 – 1 ISO 1074) with higher load chart for levelled soil applicabilities permiting higher residual loads at high lifting heights. (> 4 m).

- Excellent chassis ground clearance combined with a great tilting front and back mast that gives maximum productivity in material handling tasks in rough terrains. In contrast with traditional industrial forklifts, C 500 H model can easily load and unload trucks on unleveled and rough grounds under high working safety.

- In contrast with other industrial forklifts that equip low diameter narrow tires with minimum flotation, the C 500 H can use wide base rough terrain or mixed pattern tires for working on any kind of terrain. If terrain is of medium difficulty, 2WD model offers optimum performance due to its more reduced turning radius compared with 4WD model, without losing load handling stability.

- REXROTH "Automotive" hydrostatic transmission, in contrast with torque-converter ones, simplifies machine movement and maneouverability while sensibly reacting to commands, therefore generating intuitive control of the machine by means of throttle pedal with minimum use of brakes. By means of "inching" pedal, a slow, easy, comfortable machine approximation can be achieved to provide higher productivity and safer operation.

- Roomy and comfortable driver operation post with easy-access operation controls. Single ergonomical heavy-duty joystick with full centralized functions provides total control of operation. Gear inverter switch integrated in joystick achieves simple, fast, safe driving. Great visibility cabin combined with full-clear masts assures maximum efficiency and safety.

- Exclusive AUSA front folding cabin which facilitates periodical maintenance assuring best machine functioning while obtaining a longer product life span. A wide range of accessories permits to adapt the machine to customer requirements, including high added-value attachments assembled and tested in AUSA premises, that increase functionality.

APPLICABILITY

- Construction and Public Works: Loading and unloading of trucks, transportation of sand, concrete, and materials, stocking of material. Transportation of materials to the point of consumption where other machines are not capable due to their excessive size and weight.

- Rehabilitation: Transportation of materials to locate them inside the worksite building. Picking and cleaning of rubble with bucket and unloading to a container.

- Agriculture/Greenhouses: Loading and transportation of fruit and vegetables in different seasons. Loading of trucks and tractor trailers on agriculture ground. Maintenance and harvesting in greenhouses.

- Industry/Wood Mills/Mining/Foundry/Pre-cast concrete: Material handling such us pallets, sand in bulk, raw materials, etc during manufacturing processes. Debris loading and unloading by means of bucket or other kind of attachments.

- Landscaping and gardening: Maintenance and remodeling of green areas in municipalities, industrial estates, golf fields, etc. Loading, unloading and transportation of materials, plants, fertilizers, soil, sand, etc.

- Events: Assembly and disassembly of stands in all kind of out-door events. Easy to transport forklift by means of a truck to/from the event site.
