

SOME NOTIONS ON HUMIDITY

Air always contains a certain amount of water in the form of vapour. This determines the level of humidity in an atmosphere.

The capacity of the air to hold water vapour increases with temperature.

This is why in our homes, as soon as the temperature decreases, the vapour contained in the air condenses, as is evident on the colder surfaces in the room, such as the windows, walls etc.

The purpose of a dehumidifier is to remove the excess moisture from the air, avoiding the damage caused by condensation.

DESCRIPTION/ACCESSORIES

1. Control panel
2. Water level viewing window
3. Condensate collection tank
4. Handles
5. Air intake grille
6. Dust filter
7. Air outlet grille

Experts have established that the optimum environmental conditions for our well being and for the home are obtained between 40% and 60% relative humidity. Lower relative humidity can be achieved with higher room temperatures. For lower room temperatures the achievable relative humidity will be on the higher side, closer to 60%. Therefore, with lower room temperatures, you are recommended to heat the room even minimally.

This considerably increases the dehumidifying power of the appliance.

With heating, the condensation formed by the water vapour on windows and other cold surfaces evaporates into the air to be collected by the dehumidifier.

8. Drain hose to be used at the back of the unit
9. Pump tube to be used at the front of the unit
10. Connector for PUMP draining (first remove stopper)
11. Wheels

Delonghi Dehumidifier Dde50e Manual

Minjie Lin

De'Longhi Dehumidifier Dde50e Manual:

Eventually, you will enormously discover a additional experience and exploit by spending more cash. yet when? realize you admit that you require to acquire those every needs subsequent to having significantly cash? Why dont you try to acquire something basic in the beginning?
