Money University: Learn the Financial Literacy Course they Skipped in School Kal Salem, CPA, 2022-05-31 Welcome to the first step in your personal finance journey Whether this is the first time you have seen materials on money or have been exploring money topics for some time and are looking to understand in a robust format Everything About Money will serve you well The materials in this book are ones that do not age over time as your understanding of the materials matures it will pay you in the form of cash in your bank account from the decisions you will be able to make The book is structured as if you were taking a course on money at your local college beginning with orientation and moving throughout the course and understanding more and more complicated materials By the end of this book you should be able to identify consciously what type of money decisions you are making and how they affect your overall money picture This book was written for two reasons The first is that as an accountant people generally come to you with money questions Over time you begin to get the same questions over and over This issue seen with money is that there needs to be a comprehensive understanding of money to make decisions on your own People often seem to think asking specific questions about one transaction is sufficient to make a good decision The truth of it is that understanding your big picture how a transaction affects your ecosystem of money and what the costs over the long run are all things that need to be considered and cannot be understood without a foundational understanding of money that is what this book serves to do give you the fundamentals so that you can think about your money in a framed way This is not enough though money is a lifelong journey of learning The second reason this book was written is because we see people dig themselves into a hole too often and the solution often takes years to get out of We will understand later in the course the specifics of this but generally because people turn to banks to give them money to purchase things we see people move from working for themselves and their families to working for the bank paying the bank month over month fees for borrowing money and eventually getting into a corner where lifestyle income and expenses do not
