

Chapter 14

The Earth

The Earth is our home. All living beings live on it. The Earth is made up of land and water. About 70 percent of the Earth's surface is water and only 30 percent is land. The earth is surrounded by layer of air called the atmosphere.

The Planets

The earth and other planets are made up of the Solar system. There are eight planets in the solar system. They are Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus and Neptune.

Mercury is the smallest and Jupiter is the biggest planet.

Venus is the hottest planet in the Solar system.

Planets have no light of their own. They glow only when sunlight falls on them.

Remember: Earlier there were nine planets in the solar system. But Pluto has now been excluded from the family of planets.

The Earth

The Earth moves around the Sun. To us the Earth seems to be very big. But it is many times smaller than the sun. The sun is about 150 million kilometres away from the earth. That's why it looks small to us.
