Primates

4-8 Classroom Activities

October 2002

ACTION

1. Explain that the students will be constructing a primate dichotomous key. A dichotomous key is a biological tool used to classify organisms into distinct categories. It is constructed of several couplets (a set of two statements). Each statement of the couplet describes a certain characteristic of the organism being classified. Then a choice is made between the two statements that best fits the organisms. The initial couplets are constructed with statements that contain broad characteristics of the organisms being classified. For example: apes vs. monkeys. As couplets progress in the dichotomous key, the characteristics become more specific. For example: weight (under one pound) vs. (over one pound).

2. Write the primate list on the chalkboard or copy on an overhead. Explain that these primates will be classified by the dichotomous key.

The Limits of the Legal Complex Malcolm Feeley, Malcolm M. Feeley, Malcolm Langford, 2021 Spanning two centuries and five Nordic countries this book questions the view that political lawyers are required for the development of a liberal political regime. It combines cross disciplinary theory and careful empirical case studies by country experts whose regional insights are brought to bear on wider global contexts. The theory of the legal complex posits that lawyers will not simply mobilize collectively for material self interest; instead they will organize and struggle for the limited goal of political liberalism. Constituted by a moderate state, core civil rights and civil society freedoms, political liberalism is presented as a discrete but professionally valued good to which all lawyers can lend their support. Leading scholars claim that when one finds struggles against political repression, politics of the Legal Complex are frequently part of that struggle. One glaring omission in this research program is the Nordic region. This insightful volume provides a comprehensive account of the history and politics of lawyers of the last 200 years in the Nordic countries: Norway, Sweden, Denmark, Finland, and Iceland. Topping most global indexes of core civil rights, these states have been found to contain few to no visible legal complexes. Where previous studies have characterized lawyers as stewards and guardians of the law that seek to preserve its semi autonomous nature, these legal complexes have emerged in a manner that challenges the standard narrative. This book offers rational choice and structuralist explanations for why and when lawyers mobilise collectively for political liberalism. In each country analysis, authors place lawyers in nineteenth century state transformation and emerging constitutionalism, followed by expanding democracy and the welfare state, the challenge of fascism and world war, the tensions of the Cold War, and the latter day rights revolutions. These analyses are complemented by a comprehensive comparative introduction and a concluding reflection on how the theory of the legal complex might be recast, making The Limits of the Legal Complex an invaluable resource for scholars and practitioners alike.

War In World History: Society, Technology, and War from Ancient Times to the Present, Volume 1 Stephen Morillo, Jeremy Black, Paul Lococo, 2008-07-21 Designed for use at the college level as a textbook for military history courses or supplemental reading for world history courses, this text offers an introduction and original synthesis of global military history. Each chapter traces key developments in military institutions and practices set in three crucial contexts: politics and institutions, social structures and economics, and cultures. Primary sources throughout the text give students a look at the writings historians use to draw conclusions, while Issue Boxes raise and explore historiographical controversies in military history. A two volume format follows the usual division of world and western civilization courses and allows a standard semester split of military history survey courses. Volume One covers 2000 BC through 1500 AD. Volume Two covers the dawn of global warfare in 1500 through the present.

Rethinking Thatcher and Europe Alessandra Zanetti, 2025-11-24 This book offers a compelling exploration of Margaret Thatcher's approach to European integration during the years of her premiership, providing a

nuanced portrait of one of the most fascinating and influential political figures of recent decades Drawing on extensive archival research and featuring excerpts from speeches private papers statements and interviews this study reevaluates Thatcher s European legacy by revealing the complex evolution of her European policy during the 11 years of her premiership 1979 1990 Challenging conventional narratives Zanetti deconstructs the image of Thatcher as the master of British Euroscepticism and precursor to Brexit arguing instead that she was an asset to European integration although in her own terms Her approach was fundamentally guided by her primary role as British Prime Minister adapting both rhetoric and action to secure national interests while engaging pragmatically with the European Community Throughout her premiership Thatcher consistently chose to fight difficult and unpopular battles on the European stage positioning herself as a passionate and constructive critic whose vision for Europe s future was often divergent from that of other European leaders This work will appeal to students and scholars of European integration British political history and international relations as well as anyone seeking to more accurately understand the complex relationship between Thatcherism and Brexit
