Michael Shawn Malone, 1999 The inside story of how one of America's most beloved companies Apple Computer took off like a high tech rocket only to come crashing to Earth twenty years later No company in modern times has been as successful at capturing the public's imagination as Apple Computer From its humble beginnings in a suburban garage Apple sparked the personal computer revolution and its products and founders Steve Jobs and Steve Wozniak quickly became part of the American myth But something happened to Apple as it stumbled toward a premature middle age For ten years it lived off its past glory and its extraordinary products Then almost overnight it collapsed in a two year free fall How did Apple lose its way Why did the world still care so deeply about a company that had lost its leadership position Michael S Malone from the unique vantage point of having grown up with the company's founders and having covered Apple and Silicon Valley for years sets out to tell the gripping behind the scenes story a story that is even zanier than the business world thought In essence Malone claims with only a couple of incredible inventions the Apple II and Macintosh and backed by an arrogance matched only by its corporate ineptitude Apple managed to create a multibillion dollar house of cards And like a faulty program repeating itself in an infinite loop Apple could never learn from its mistakes The miracle was not that Apple went into free fall but that it held up for so long Within the pages of Infinite Loop we discover a bruising portrait of the megalomaniacal Steve Jobs and an incompetent John Sculley as well as the kind of political backstabbing stupid mistakes and overweening egos more typical of a soap opera than a corporate history Infinite Loop is almost as wild and unpredictable as exhilarating and gut wrenching as the story of Apple itself
