R Machine Learning by Example Raghav Bali, Dipanjan Sarkar, 2016 Understand the fundamentals of machine learning with R and build your own dynamic algorithms to tackle complicated real world problems successfully About This Book Get to grips with the concepts of machine learning through exciting real world examples Visualize and solve complex problems by using power packed R constructs and its robust packages for machine learning Learn to build your own machine

learning system with this example based practical guide

Who This Book Is For If you are interested in mining useful information from data using state of the art techniques to make data driven decisions this is a go to guide for you No prior experience with data science is required although basic knowledge of R is highly desirable Prior knowledge in machine learning would be helpful but is not necessary

What You Will Learn Utilize the power of R to handle data extraction manipulation and exploration techniques Use R to visualize data spread across multiple dimensions and extract useful features Explore the underlying mathematical and logical concepts that drive machine learning algorithms Dive deep into the world of analytics to predict situations correctly Implement R machine learning algorithms from scratch and be amazed to see the algorithms in action Write reusable code and build complete machine learning systems from the ground up Solve interesting real world problems using machine learning and R as the journey unfolds Harness the power of robust and optimized R packages to work on projects that solve real world problems in machine learning and data science

In Detail Data science and machine learning are some of the top buzzwords in the technical world today From retail stores to Fortune 500 companies everyone is working hard to making machine learning give them data driven insights to grow their business With powerful data manipulation features machine learning packages and an active developer community R empowers users to build sophisticated machine learning systems to solve real world data problems This book takes you on a data driven journey that starts with the very basics of R and machine learning and gradually builds upon the concepts to work on projects that tackle real world problems You ll begin by getting an understanding of the core concepts and definitions required to appreciate machine learning algorithms and concepts Building upon the basics you will then work on three different projects to apply the concepts of machine learning following current trends and cover major algorithms as well as popular R packages in detail These projects have been neatly divided into six different chapters covering the worlds of e commerce finance and social media which are at the very core of this data driven revolution Each of the projects will help you to understand explore visualize and derive insights depending upon the domain and algorithms Through this book you will learn to apply the concepts of machine learning to deal with data related problems and solve them using the powerful yet simple language R

Style and approach The book is an enticing journey that starts from the very basics to gradually pick up pace as the story unfolds Each concept is first defined in the larger context of things succinctly followed by a detailed explanation of their application Each topic is explained with the help of a project that solves a real real world problem involving hands on work thus giving you a deep insight into the world of machine learning
