**Hoodwinked** John Perkins, 2011-11-01 John Perkins has seen the signs of today's economic meltdown before. The subprime mortgage fiascos, the banking industry collapse, the rising tide of unemployment, the shuttering of small businesses across the landscape are all too familiar symptoms of a far greater disease. In his former life as an economic hit man, he was on the front lines both as an observer and a perpetrator of events once confined only to the third world that have now sent the United States and in fact the entire planet spiraling toward disaster. Here Perkins pulls back the curtain on the real cause of the current global financial meltdown. He shows how we've been hoodwinked by the CEOs who run the corporatocracy, those few corporations that control the vast amounts of capital and resources around the globe and the politicians they manipulate. These corporate fat cats, Perkins explains, have sold us all on what he calls predatory capitalism, a misguided form of geopolitics and capitalism that encourages a widespread exploitation of the many to benefit a small number of the already very wealthy. Their arrogance, gluttony, and mismanagement have brought us to this perilous edge. The solution is not a return to normal. But there is a way out. As Perkins makes clear, we can create a healthy economy that will encourage businesses to act responsibly, not only in the interests of their shareholders and corporate partners and the lobbyists they have in their pockets but in the interests of their employees, their customers, the environment, and society at large. We can create a society that fosters a just, sustainable, and safe world for us and our children. Each one of us makes these choices every day in ways that are clearly spelled out in this book. We hold the power, he says, if only we recognize it. *Hoodwinked* is a powerful polemic that shows not only how we arrived at this precarious point in our history but also what we must do to stop the global tailspin.

**A Social History of Contemporary Democratic Media** Jesse Drew, 2013-05-02 The last few decades have helped dispel the myth that media should remain driven by high-end professionals and market share. This book puts forward the concept of communications from below in contrast to the globalization from above that characterizes many new developments in international organization and media practices. By examining the social and technological roots that influence current media evolution, Drew allows readers to understand not only the Youtubes and Facebooks of today but to anticipate the trajectory of the technologies to come. Beginning with a look at the inherent weaknesses of the U.S. broadcasting model of mass media, Drew outlines the early 1960s and 1970s experiments in grassroots media where artists and activists began to re-engineer electronic technologies to target local communities and underserved audiences. From these local projects emerged national and international communications projects creating production models, social networks, and citizen expectations that would challenge traditional means of electronic media and cultural production. Drew's perspective puts the social and cultural use of the user at the center, not the particular media form. Thus the structure of the book focuses on the local, the national, and the global desire for communications regardless of the means. *Think or Be Eaten* Angie Riedel, 2016-10-29 What a shame that someone out there, some group of very strange people, have such a strong driving need to destroy mankind to enslave it.

and humiliate it and teach us all to believe that we have no value and we don't matter and we can't think for ourselves The wars and genocides are all a part of some grotesque greater plan and separating the human being from himself is the beginning and end of hope for our species But we don't have to go along with anything that we know is evil or wrong or destructive We don't have to choose to be devalued and disrespected by anyone who claims to be more important than ourselves We already know that no legitimate being would tell us to be less than we are It's the overt demand that we stop existing That's slow death from the inside out On a vast scale when all of society gets down on its knees to mere men who say they must it is spiritual genocide We are free to stop doing it anytime **What's the Point of News?** Tony

Harcup,2020-03-30 This book questions whether the news we get is as useful for citizens as it could or should be This international study of news is based on rethinking and reconceptualising the news values that underpin understandings of journalism It goes beyond empirical descriptions of what journalism is to explore normative ideas of what it might become if practised alongside commitments to ethical listening active citizenship and social justice It draws lessons from both alternative and mainstream media output from both journalists and scholars from both practice and theory It challenges dominant news values by drawing on insights from feminism peace journalism and other forms of critical thinking that are usually found on the margins of journalism studies This original and engaging contribution to knowledge proposes an alternative set of contemporary news values that have significant implications for the news industry for journalism education and for democracy itself **Getting Haiti Right this Time** Noam Chomsky,Paul Farmer,Amy Goodman,2004 The U S has
