The Democratic Virtues of the Christian Right Jon A. Shields, 2009-02-22 Jon Shields argues that religious conservatives have in fact dramatically increased and improved democratic participation and that they are far more civil and reasonable than is commonly believed from publisher description

Democratic Delusions Richard J. Ellis, 2002 It is becoming common in many states the opportunity to reclaim government from politicians by simply signing a petition to put an initiative on the ballot and then voting for it Isn't this what America ought to be about Proposition 13 in California's 1978 election paved the way the past decade saw more than 450 such actions now in many states direct legislation dominates the political agenda and defines political and public opinion While this may appear to be democracy in action Richard Ellis warns us that the initiative process may be putting democracy at risk In *Democratic Delusions* he offers a critical analysis of the statewide initiative process in the United States challenging readers to look beyond populist rhetoric and face political reality Through engaging prose and illuminating and often amusing anecdotes Ellis shows readers the dark side of direct democracy specifically the undemocratic consequences that result from relying too heavily on the initiative process He provides historic context to the development of initiatives from their Populist and Progress roots to their accelerated use in recent decades and shows the differences between initiative processes in the states that use them Most important while acknowledging the positive contribution of initiatives Ellis shows that there are reasons to use them carefully and sparingly ill considered initiatives can subvert normal legislative checks and balances undermine the deliberative process and even threaten the rights of minority groups through state sanctioned measures Today's initiative process Ellis warns is dominated not by ordinary citizens but by politicians perennial activists wealthy interests and well oiled machines Deliberately misleading language on the ballot confuses voters and influences election results And because many initiatives are challenged in the courts these ostensibly democratic procedures have now put legislation in the hands of the judiciary Throughout his book he cites examples drawn from states in which initiatives are used intensively Oregon California Colorado Washington and Arizona as well as others in which their use has increased in recent years Undoing mistakes enacted by initiative can be more difficult than correcting errors of legislatures As voters prepare to consider the host of initiatives that will be offered in the 2002 elections this book can help put those efforts in a clearer light *Democratic Delusions* urges moderation attempting to teach citizens to be at least as skeptical of the initiative process as they are of the legislative process and to appreciate the enduring value of the representative institutions they seek to circumvent

Democratic Dilemmas of Teaching Service-Learning Christine M. Cress, David M. Donahue, 2023-07-03 A college student wants to lead a campaign to ban a young adult novel from his child's elementary school as his service learning project in a children's literature course Believing the book is offensive to religious sensibilities he sees his campaign as a service to children and the community Viewing such

a ban as limiting freedom of speech and access to information the student s professor questions whether leading a ban qualifies as a service project If the goal of service is to promote more vital democratic communities what should the student do What should the professor do How do they untangle competing democratic values How do they make a decision about action This book addresses the teaching dilemmas such as the above that instructors and students encounter in service learning courses Recognizing that teaching in general and service learning in particular are inherently political this book faces up to the resulting predicaments that inevitably arise in the classroom By framing them as a vital and productive part of the process of teaching and learning for political engagement this book offers the reader new ways to think about and address seemingly intractable ideological issues Faculty encounter many challenges when teaching service learning courses These may arise from students resistance to the idea of serving their lack of responsibility wasting clients and community agencies time and money the misalignment of community partner expectations with academic goals or faculty uncertainty about when to guide students experiences and when direct intervention is necessary In over twenty chapters of case studies faculty scholars from disciplines as varied as computer science engineering English history and sociology take readers on their and their students intellectual journeys sharing their messy unpredictable and often inspiring accounts of democratic tensions and trials inherent in teaching service learning Using real incidents and describing the resources and classroom activities they employ they explore the democratic intersections of various political beliefs along with race ethnicity class gender ability sexual orientation and other lived differences and likenesses that students and faculty experience in their service learning classroom and extended community They share their struggles of how to communicate and interact across the divide of viewpoints and experiences within an egalitarian and inclusive environment all the while managing interpersonal tensions and conflicts among diverse people in complex value laden situations The experienced contributors to this book offer pedagogical strategies for constructing service learning courses and non prescriptive approaches to dilemmas for which there can be no definitive solutions
