Echoing Events Tina van der Vlies, 2022-12-12 Echoing Events questions the perpetuation actualization and canonization of national narratives in English and Dutch history textbooks wide reaching media that tendentially inspire a sense of meaning memory and thus also identity The longitudinal study begins in the 1920s when the League of Nations launched several initiatives to reduce strong nationalistic visions in textbooks and ends in the new millennium with the revival of national narratives in both countries The analysis shows how and why textbook authors have narrated different histories which vary in terms of context epoch and place as echoing events by using recurring plots and the same combinations of historical analogies This innovative and original study thus investigates from a new angle the resistance of national narratives to change **International Solidarity in the Low Countries during the Twentieth Century** Kim Christiaens, John Nieuwenhuys, Charel Roemer, 2020-10-12 During the 20th century a variety of social movements and civil society groups stepped into the arena of international politics This volume collects innovative research on international solidarity movements in Belgium and the Netherlands and places these movements prominently in debates about the history of globalization transnational activism and international politics *Fortaellinger* N. knowledge and awareness of the young The volume therefore not only addresses officially sanctioned and regulated sex education delivered within the school system and regulated by the State and in some cases the Church but also the content iconography and experience of sexual enlightenment within the private sphere of the family and as portrayed through the media American Book Publishing Record Cumulative, 1950-1977 R.R.
