Professional Empowerment in the Software Industry through Experience-Driven Shared Tacit Knowledge Hui Chen, Miguel Baptista Nunes, 2023-05-19

This book addresses the identification and classification of knowledge acquired through experience that results from engaging in professional activities within the software industry As a result of this study the book presents an ontology of such professional activities that require and enable the acquisition of experience and that in turn are the basis for tacit knowledge creation The rationale behind the creation of such an ontology

was based on the need to externalize this tacit knowledge and then record such externalizations so that these can be shared and disseminated within and across organizations The book discusses the very concise manner in which experienced software development practitioners in China understand the nature and value of experience in the SW industry effectively communicate with other stakeholders in the software development process are able and motivated to actively engage with continuous professional development are able to share knowledge with peers and the profession at large and effectively work on projects and exhibit a sound professional attitude both internally to their own company and externally to customers partners and even competitors The book also discusses the ontology and the qualitative process that are generated by bridging two extremely topical aspects of practice in the software industry namely employability skills and competencies The book is of interest to academics in the areas of knowledge management and information systems as well as human resources practitioners concerned with selection and development and knowledge and information professionals in software organizations

Mixed Methods in Criminology Vicky Heap,Jaime Waters,2019-01-10 Mixed Methods in Criminology is the first book to bring together the discipline of criminology with the mixed methods research strategy which has become increasingly prominent within criminological teaching and research The book is structured so that it charts the course of a criminological mixed methods study Starting with an introduction to mixed methods and its implications for criminology and criminological research the book then works systematically through the planning stages of a research project Developing research questions aims and objectives is discussed alongside literature searching skills and the project planning process before the principles and practice of ethical research are summarised Next come chapters on philosophy mixed methods design combining the data research design and sampling data collection methods and data analysis delivering a comprehensive overview of how to undertake a mixed methods research project in practice This is followed by a chapter on troubleshooting which provides useful advice from experienced mixed methods researchers before a detailed account of how to write up mixed methods research is presented The book concludes with a range of real life mixed methods case studies to demonstrate how the techniques outlined in this book have been employed in reality and to inspire new criminological mixed methods projects Providing straightforward easy to follow guidance Mixed Methods in Criminology is the essential student companion for any criminological mixed methods research project Drawing on the authors years of experience teaching research methods the book is written in a supportive and encouraging tone that will serve as a reference and guide for those embarking on their adventures in the field

The Holy Spirit in African Christianity Chigor Chike,2015-04-01 This book is a study of what African Christians living in Britain believe about the Holy Spirit

Preach the Word Myles MacBean,2019-11-11 How should we help equip the church leaders of Africa today There remains a well documented lack of theologically sound Bible centric preaching in Sub Saharan Africa The majority of sermons are preached by untrained or undertrained church leaders Following a practical theology praxis this book develops a conceptual framework for the

evaluation of existing alternative approaches to grassroots preacher training It also proposes broad principles for effective preacher training and offers a practical solution The 20th century had seen the Christian church in Africa grow 36 fold to 360 million This amazing growth is arguably the largest religious change in human history in such a short period It has shifted the focus of Christianity from North to South This rapid growth is debatably considered by some missiologists and theologians to have resulted in an African church a mile wide and an inch deep That is a church of great size but lacking in spiritual depth The rapid growth has led to insufficient numbers of trained leaders being available to oversee their congregations Most leaders are unpaid Untrained or undertrained leaders have an inadequate knowledge of scripture and lack understanding of its interpretation They also lack the skills they need to communicate its truths Even so they preach up to 90% of the sermons in rural Africa Despite a tremendous hunger for training among many of those preachers traditional college based theological education cannot keep up with the demand for trained pastors and preachers in an affordable or culturally appropriate manner *A Teacher's Guide to Classroom Research* David Hopkins, 2008-09 This practical guide is for teachers who wish to undertake research in their classrooms with a view to improving their practice It will enable teachers to enhance their own or their colleagues teaching and to test educational theory **Choice** ,2007-03

Foundations of Playwork Fraser Brown, Chris Taylor, 2008 This book provides a holistic overview of contemporary play and playwork Straightforward and accessible it covers topics such as playwork identity play environments the role of the playworker values and ethics play and playwork theory and at the heart of the book a special chapter located at the cutting edge of 21st century play theory BOOK JACKET **Doing Your Education Research Project** Neil Burton, Mark Brundrett, Marion Jones, 2008-04 A handy and approachable book to guide students through their education research project

Proceedings of the Fifth International Conference on the Ethiopian Economy Getnet Alemu, Edilegnaw Wale, 2007 *Cultivating Learning Within Projects* Andrew Sense, 2007-10-31 Drawing on new research this book offers an entirely fresh perspective on how to cultivate learning within a project environment It provides a framework to facilitate project practitioners systematic reflection on their learning activities and to assist them in building a project learning practice It also

identifies new points of interest for researchers to further investigate the learning phenomenon in projects This book weaves together diverse theories and empirical data in a way that should appeal to a wide academic and practitioner audience and challenges all readers to consider intra project learning as primarily a social activity which requires their deliberate commitment understanding and attention
