Mechanization for Rural Development Josef Kienzle, John E. Ashburner, B. G. Sims, 2013 This publication gives a wide ranging perspective on the present state of mechanization in the developing world and as such constitutes a solid platform on which to build strategies for a sustainable future Farm mechanization forms an integral plank in the

implementation of sustainable crop production intensification methodologies and sustainable intensification necessarily means that the protection of natural resources and the production of ecosystem services go hand in hand with intensified production practices. This requires specific mechanization measures to allow crops to be established with minimum soil disturbance to allow the soil to be protected under organic cover for as long as possible and to establish crop rotations and associations to feed the soil and to exploit crop nutrients from various soil horizons. This work is the starting point to help the reader understand the complexities and requirements of the task ahead.
