Artificial Intelligence for Advanced Problem Solving Techniques Vlahavas, Ioannis, Vrakas, Dimitris, 2008-01-31

One of the most important functions of artificial intelligence automated problem solving consists mainly of the development of software systems designed to find solutions to problems. These systems utilize a search space and algorithms in order to reach a solution. Artificial Intelligence for Advanced Problem Solving Techniques offers scholars and practitioners cutting edge research on algorithms and techniques such as search domain independent heuristics, scheduling, constraint satisfaction, optimization, configuration and planning, and highlights the relationship between the search categories and the various ways a specific application can be modeled and solved using advanced problem solving techniques. **Advanced artificial**

Advanced Applications of Generative AI and Natural Language Processing Models Obaid, Ahmed J., Bhushan, Bharat, S., Muthmainnah, Rajest, S. Suman, 2023-12-21. The rapid advancements in Artificial Intelligence (AI) specifically in Natural Language Processing (NLP) and Generative AI pose a challenge for academic scholars. Staying current with the latest techniques and applications in these fields is difficult due to their dynamic nature, while the lack of comprehensive resources hinders scholars' ability to effectively utilize these technologies. *Advanced Applications of Generative AI and Natural Language Processing Models* offers an effective solution to address these challenges. This comprehensive book delves into cutting edge developments in NLP and Generative AI. It provides insights into the functioning of these technologies, their benefits, and associated challenges. Targeting students, researchers, and professionals in AI, NLP, and computer science, this book serves as a vital reference for deepening knowledge of advanced NLP techniques and staying updated on the latest advancements in generative AI. By providing real world examples and practical applications, scholars can apply their learnings to solve complex problems across various domains. Embracing *Advanced Applications of Generative AI and Natural Language Processing Models* equips academic scholars with the necessary knowledge and insights to explore innovative applications and unleash the full potential of generative AI and NLP models for effective problem solving. **Advanced Topics in**

Artificial Intelligence Norman Foo, 2007-12-07. The 12th Australian Joint Conference on Artificial Intelligence (AIJAI) held in Sydney, Australia, 6-10 December 1999, is the latest in a series of annual regional meetings at which advances in artificial intelligence are reported. This series now attracts many international papers, and indeed the constitution of the program committee reflects this geographical diversity. Besides the usual tutorials and workshops, this year the conference included a companion symposium at which papers on industrial applications were presented. The symposium papers have been published in a separate volume edited by Eric Tsui. AIJAI is organized by the University of New South Wales and sponsored by the Australian Computer Society, the Commonwealth Scientific and Industrial Research Organisation (CSIRO) Computer Sciences Corporation, the KRRU group at Griffith University, the Australian Artificial Intelligence Institute, and Neuron Works.

Ltd Ar99 received over 120 conference paper submissions of which about a third were from outside Australia. From these 39 were accepted for regular presentation and a further 15 for poster display. These proceedings contain the full regular papers and extended summaries of the poster papers. All papers were refereed mostly by two or three reviewers selected by members of the program committee and a list of these reviewers appears later. The technical program comprised two days of workshops and tutorials followed by three days of conference and symposium plenary and paper sessions.

Advanced Topics in Artificial Intelligence Vladimír Mařík, Olga Štěpánková, Robert Trappl, 1992. This volume contains the texts of 26 lectures and contributions to the program of the International Summer School on Advanced Topics in Artificial Intelligence held in Prague, Czechoslovakia, July 6-17, 1992. The summerschool was intended for postgraduate students, researchers, and all those who want to learn about recent progress in both theoretical and applied AI. The papers in the volume are organized into nine parts: Introduction, Logic and logic programming, Machine learning, Planning and scheduling, Uncertainty, Second generation expert systems and knowledge engineering, Qualitative reasoning, Neurocomputing, Natural language and interfaces.

Education Reimagined: The Impact of Advanced Technologies on Learning
 Mohammad Khalil, Mohammed Saqr, Sonsoles López-Pernas, Isabel Hilliger, 2024-12-18. The last decade has seen significant progress in technology, particularly in the fields of Artificial Intelligence and machine learning, which have had a profound impact on numerous industries, including education. The integration of technology in education has fundamentally altered the landscape of learning, where data becomes a crucial component to provide insights into, for example, how students learn, when and where additional support is needed. Employing educational data is proving to be a catalyst for innovation in education, opening up new possibilities for students and educators alike. The focus of this Research Topic is to explore the impact of recent technological innovations and advances, such as AI-powered Chatbots, Learning Analytics, Virtual and Augmented Reality, and remote and virtual labs, on different education systems, both from the educational and the psychological perspective. The scope is twofold: on the one hand, examining the use of these advanced technologies in learning and teaching activities; and on the other hand, teaching students about these technologies and understanding the impact of including them in new education policies and curricula, including teaching of AI, data science, analytics, and the ethical implications of data. The Research Topic seeks to provide insightful and thought-provoking perspectives on how technology is being utilized to enhance the learning experience for students of all ages, both in higher education and K12 education, and their transition to higher education. By gathering experts in psychology, education, and technology, this Research Topic aims to present research findings and best practices and to stimulate discussions on the role of technology in shaping the future of education. The ultimate objective is to inspire innovation and to improve the education of future generations through advanced technologies.
