LESS Tomorrow in legal tech *Blank Check, A Novel* Aaron Smith, PhD, 2020-05-05 A fictional tale grounded in pure
reality Blank Check an intriguing inspirational Young Adult novel that takes place on a fictional U S island After serving his
country as an Army Ranger high school principal Josiah Rollins quits in disgust over the broken educational system he can no
longer serve Little does he know this impulsive act would lead him to an unbelievable opportunity to change everything and
serve his country and students in the way he had always dreamed Inspired and funded by a now billionaire war buddy Josiah
tests his educational theories in a place with low standards and poor student performance the American Caribbean Islands
The mission is simple give teachers autonomy and freedom to teach and provide the community the power to make schools
the center of their community But many on the Island are not happy about the project nor do they trust the white man selling
them new ideas Within Blank Check learn how Josiah wins over the people and the students transforming the community and
the economy into the American Dream *Multisensory Integration as a Pathway to Neural Specialization for Print in Typical
And Dyslexic Readers Across Writing Systems* Susana Araújo, Tânia Fernandes, Urs Maurer, 2022-06-27 **Towards a
neuroscience of social interaction** Ulrich Pfeiffer, Bert Timmermans, Kai Vogeley, Chris Frith, Leonhard Schilbach, The
burgeoning field of social neuroscience has begun to illuminate the complex biological bases of human social cognitive
abilities However in spite of being based on the premise of investigating the neural bases of interacting minds the majority of
studies have focused on studying brains in isolation using paradigms that investigate offline social cognition i e social
cognition from a detached observer s point of view asking study participants to read out the mental states of others without
being engaged in interaction with them Consequently the neural correlates of real time social interaction have remained
elusive and may paradoxically represent the dark matter of social neuroscience More recently a growing number of
researchers have begun to study online social cognition i e social cognition from a participant s point of view based on the
assumption that there is something fundamentally different when we are actively engaged with others in real time social
interaction as compared to when we merely observe them Whereas for offline social cognition interaction and feedback are
merely a way of gathering data about the other person that feeds into processing algorithms inside the agent it has been
proposed that in online social cognition the knowledge of the other at least in part resides in the interaction dynamics
between the agents Furthermore being a participant in an ongoing interaction may entail a commitment toward being

responsive created by important differences in the motivational foundations of online and offline social cognition In order to promote the development of the neuroscientific investigation of online social cognition this Frontiers Research Topic aims at bringing together contributions from researchers in social neuroscience and related fields whose work involves the study of at least two individuals and sometimes two brains rather than single individuals and brains responding to a social context Specifically this Research Topic will adopt an interdisciplinary perspective on what it is that separates online from offline social cognition and the putative differences in the recruitment of underlying processes and mechanisms Here an important focal point will be to address the various roles of social interaction in contributing to and at times constituting our awareness of other minds For this Research Topic we therefore solicit reviews original research articles opinion and method papers which address the investigation of social interaction and go beyond traditional concepts and ways of experimentation in doing so While focusing on work in the neurosciences this Research Topic also welcomes contributions in the form of behavioral studies psychophysiological investigations methodological innovations computational approaches developmental and patient studies By focusing on cutting edge research in social neuroscience and related fields this Frontiers Research Topic will create new insights concerning the neurobiology of social interaction and holds the promise of helping social neuroscience to really go social
