The book is illustrated throughout with international examples of work by professionals and students in the discipline of architecture and other related design professions.

Building the Architect's Character Kendra Schank Smith, Albert Smith, 2017-12-22 An understanding of architects' character traits can offer important insights into how they design buildings. These traits include leadership skills, necessary to coordinate a team, honest and ethical behavior, being well educated, and possessing a life-long love of learning, flexibility, resourcefulness, and visionary and strategic thinking. Characteristics such as these describe a successful person. Architects also possess these traits but they have additional skills specifically valuable for the profession. These will include the ability to question the use of digital media, new materials, processes, and methods to convey meaning in architectural form. Although not exhaustive, a discussion of such subjects as defining, imaging, persuading, and fabricating will reveal representational meaning useful for the development of an understanding of architects' character. Through the analogies and metaphors found in Greek myth, the book describes the elusive, hard-to-define characteristics of architects to engage the dilemmas of a changing architectural landscape. *Building the Architect's Character: Explorations in Traits* examines traditional and archetypal characteristics of the successful architect to ask if they remain relevant today.

The Inner Studio Andrew Levitt, 2007 Filled with examples and exercises, *The Inner Studio* guides readers into deeper levels of our imagination and decision making, focusing on the experience of the designer during the creative act of design.
