Business Objects X1 R3 Tools Guide:

Crystal Reports XI Official Guide Neil FitzGerald, et al., 2006-11-01 The authorized guide to the latest edition of the 1 business intelligence software product Crystal Reports More than 16 million licenses of Crystal Reports have been shipped to date This book is a reference designed to provide hands on guidance for the latest release of the product suite The latest version of Crystal Reports and the Business Objects enterprise reporting suite delivers vast product enhancements and a tighter integration that will drive upgrades from licensees Brand new features e g Dynamic and Cascading Parameter Generation will also appeal to new audiences Over 1 million new Business Intelligence licensees will be migrating to the Crystal Enterprise Reporting platform as this is the first release of the software with the existing Business Objects BO products being integrated into the Crystal infrastructure As Business Objects insiders the authors bring unique and valuable real world perspectives on implementations and uses of the Crystal Reports product The book also includes content tutorials and samples for reporting within the Microsoft Visual Studio NET and J2EE development environments and also on top of the SAP Business Information Warehouse BW and the Peoplesoft platform Advanced content on report distribution and integration into the secured managed reporting solution known as Business Objects Enterprise XI is also now included in this definitive user guide with coverage on the new Web Services SDK *Peter Norton's Guide to Access 2000 Programming* Peter Norton, Virginia Andersen, 2000 The purpose of this book is to provide a bridge between Access 2000 as an efficient front end development tool and the intricate world of Visual Basic programming It is intended to offer the necessary tools for managing information in all levels of business from large offices to entrepreneurs and consultants Exercises throughout each chapter guide and encourage the reader in exploring the topics further using the files found on the accompanying CD *A Practical Introduction to Hardware/Software Codesign* Patrick R. Schaumont, 2012-11-27 This textbook serves as an introduction to the subject of embedded systems design with emphasis on integration of custom hardware components with software The key problem addressed in the book is the following how can an embedded systems designer strike a balance between flexibility and efficiency The book describes how combining hardware design with software design leads to a solution to this important computer engineering problem The book covers four topics in hardware software codesign fundamentals the design space of custom architectures the hardware software interface and application examples The book comes with an associated design environment that helps the reader to perform experiments in hardware software codesign Each chapter also includes exercises and further reading suggestions Improvements in this second edition include labs and examples using modern FPGA environments from Xilinx and Altera which will make the material in this book applicable to a greater number of courses where these tools are already in use More examples and exercises have been added throughout the book If I were teaching a course on this subject I would use this as a resource and text If I were a student who wanted to learn codesign I would look for a course that at least used a similar approach If I were an engineer or engineering manager

who wanted to learn more about codesign from a very practical perspective I would read this book first before any other

When I first started learning about codesign as a practitioner a book like this would have been the perfect introduction Grant Martin Tensilica **Commerce Business Daily** ,1999-07 *Object-Oriented and Internet-Based Technologies* Mathias Weske,Peter Liggesmeyer,2004-12-07 Based on the Net ObjectDays tradition of bringing together researchers from academia and industry on the one hand and system architects developers and users from industry and administration on the other hand this year's conference took an international research perspective so that we see the first volume of Net ObjectDays main conference proceedings published in the Springer Lecture Notes in Computer Science series This volume consists of 16 papers carefully selected in a rigorous reviewing process by an international program committee to provide a concise overview these papers are briefly described In the Languages and Models session Beate Ritterbach proposes a new language element for object oriented programming languages that supports arbitrary value types In her contribution Support for Value Types in an Object Oriented Programming Language she describes the corresponding keywords syntax and consistency checks thereby giving an impression of the look and feel of value types from an application programmer's perspective Walter Binder and Jarle Hulaas look at portable CPU accounting and control in Java which is based on program transformation techniques In their paper Self accounting as Principle for Portable CPU Control in Java periodically the threads of an application component aggregate the information of their respective CPU consumption within a shared account scheduling functions make sure applications do not exceed their allowed CPU share *Service-Oriented Computing ICSOC 2006* Dimitrios Georgakopoulos,Norbert Ritter,Boualem Benatallah,Christian Zirpins,George Feuerlicht,Marten Schoenherr,Hamid R.
