Krieg,1992 Epidemics and their effects on human populations have provided a literary theme extending from the Bible to Albert Camus s The Plague yet this theme is significantly absent from the literature of the United States Why In this groundbreaking study Joann P Krieg uncovers the hidden concerns in the American psyche concerning epidemic diseases as she traces evidence of specific fears peculiar to the development of a national self consciousness especially with regard to nature in the New World Beginning with the colonial era ministers politicians and writers have downplayed denied or only obliquely alluded to such public miseries as smallpox

yellow fever cholera tuberculosis and now AIDS partly because of a fervent need to believe that only the old world of Europe is plague ridden and corrupt America by contrast is fresh and green its people ever young and healthy This attitude of denial affected even the greatest of American writers some of whom such as Charles Brockden Brown Ralph Waldo Emerson and Henry David Thoreau were themselves victims of epidemical diseases Nathaniel Hawthorne Edgar Allan Poe and Walt Whitman broached the subject of epidemics though often indirectly or with ambivalence Later Henry James Willa Cather and Katherine Anne Porter brought psychological awareness to the portrayal of dilemmas raised when Americans confronted epidemic illness at a personal level Today AIDS challenges the hope of many Americans that geographical distance will provide immunity As Krieg demonstrates new literature by Larry Kramer Paul Monette and Susan Sontag speaks with increasing daring about the once taboo subject of epidemics and their impact on national myths as well as on individual lives
