A Rigorous Semantics for BPMN 2.0 Process Diagrams Felix Kossak,Christa Illibauer,Verena Geist,Jan Kubovy,Christine Natschläger,Thomas Ziebermayr,Theodorich Kopetzky,Bernhard Freudenthaler,Klaus-Dieter Schewe,2015-02-04 This book provides the most complete formal specification of the semantics of the Business Process Model and Notation 2.0 standard BPMN available to date in a style that is easily understandable for a wide range of readers not only for experts in formal methods but e.g. also for developers of modeling tools software architects or graduate students specializing in business process management BPMN issued by the Object Management Group is a widely used standard for business process modeling However major drawbacks of BPMN include its limited support for organizational modeling its only implicit expression of modalities and its lack of integrated user interaction and data modeling Further in many cases the syntactical and in particular semantic definitions of BPMN are inaccurate incomplete or inconsistent The book addresses concrete issues concerning the execution semantics of business processes and provides a formal definition of BPMN process diagrams which can serve as a sound basis for further extensions i.e. in the form of horizontal refinements of the core language To this end the Abstract State Machine ASMs method is used to formalize the semantics of BPMN ASMs have demonstrated their value in various domains e.g. specifying the semantics of programming or modeling languages verifying the specification of the Java Virtual Machine or formalizing the ITIL change management process This kind of improvement promotes more consistency in the interpretation of comprehensive models as well as real exchangeability of models between different tools In the outlook at the end of the book the authors conclude with proposing extensions that address actor modeling including an intuitive way to denote permissions and obligations integration of user centric views a refined communication concept and data integration
