Aviation Investment Doramas Jorge-Calderon, 2016-04-15 Aviation Investment uniquely addresses investment appraisal methods across the key industries that make up the aviation sector including the airports air traffic management airline and aircraft manufacturing or aeronautic industries It is a practice oriented book where methods are presented through realistic case studies The emphasis is on economic appraisal or cost benefit analysis in order to determine the viability of projects not only for private investors but for society as a whole Financial cash flow appraisal is illustrated alongside economic appraisal as the latter builds on the former but also to show how economic appraisal enhances standard financial appraisal to determine the long term sustainability of any investment Aviation is a capital intensive sector that is growing rapidly with world traffic expected to double over the next 15 years or so A great deal of economic appraisal of investment projects takes place already

as aviation is subject to government intervention through economic regulation and financial support and as both investors and policy makers seek to understand issues such as how environmental legislation may impact the viability of investments Both economic growth and welfare go hand in hand with sound investment decisions particularly regarding sectors such as aviation where investments are large and almost invariably debt financed Aviation Investment offers all aviation sub sectors a single source reference bringing together the theoretical background of the economic appraisal literature and aviation investment in practice It is written in a style that is accessible to non academic professionals using formulae only where strictly necessary to enable practical applications and benefits from the substantial practical experience of the author

Firm, Equity Asset, and Fixed Income Securities Valuation Vusani Moyo, 2024-08-12 This textbook begins by introducing the concept of the time value of money and explaining how it is applied in valuation It then uses practical and easy to understand examples to illustrate the application of the time value of money concept in valuing cash flows annuities and perpetuities This is followed by an in depth discussion of the firm's financing sources and the determination of its cost of capital The remainder of the textbook discusses the valuation of fixed income securities equity assets and the firm featuring specific examples and case studies from South Africa Europe and the Americas Equity asset and firm valuation approaches discussed include variants of single and multiple stage growth dividend discount models free cash flows residual income and multiple valuation approaches The practical examples and case studies equip students with the tools they need to apply these valuation approaches Aimed at upper undergraduate and postgraduate accounting and finance students this textbook discusses in which context each valuation approach is most appropriate Electronic supplementary materials are available online by chapter
