Breast Cancer Epidemiology:

Breast Cancer Epidemiology Christopher Li, 2009-11-11 Breast cancer remains a disease of considerable public health importance worldwide with over 800 000 new cases diagnosed globally each year Considerable energy is currently being spent by researchers to further our understanding of this complex disease however keeping up with all of the new data is a real challenge given the sheer volume of information that becomes available on a daily basis The purpose of this book would be to provide a comprehensive review of breast cancer epidemiology covering the topics of disease burden etiology risk factors prevention early detection screening treatment and outcomes The book would be a single comprehensive source of the most recent information on breast cancer epidemiology and it would serve as a valuable resource for breast cancer researchers across disciplines regardless of what stage of their career they are in To the knowledge of the editor no such resource is currently available **Breast and Gynecologic Cancer Epidemiology** Jennifer L. Kelsey, Nancy G.

Hildreth, 2019-10-10 Published in 1983 It is the authors intent to provide an overview of the state of knowledge of the epidemiology of cancers of the breast corpus uteri ovary cervix uteri vulva and vagina as of the end of 1981 Cancer Epidemiology and Prevention David Schottenfeld, Joseph F. Fraumeni, 2006-08-24 Drawing widely from international sources the new edition of this reference book on cancer causes incidence mortality and survival patterns also includes chapters on social class obesity physical activity and chemoprevention plus other related topics in the field Fundamentals of Cancer Epidemiology Philip C. Nasca, Harris Pastides, 2001 Ideal for first time students Fundamentals of Cancer Epidemiology summarizes the current body of knowledge of what cancer is how it is defined what causes it how it develops in biological and genetic terms and its descriptive epidemiology Using a unique framework this text helps students develop an in depth understanding of major risk factors and how they affect specific cancers as well as how co factors contribute to risk for particular cancers Features include Content structured for a 15 week course exercises at the end of each chapter co authored content for uniformity and continuity *Women at High Risk to Breast Cancer* B.A. Stoll, 2012-12-06 A reprint of the 1989 edition of this book has been made necessary by continuing demand after rapid exhaustion of the first printing In the two years since its appearance there has been relatively little expansion of knowledge on this topic and its massive accumulation of references still remains an authoritative guide in the difficult task of developing a national breast cancer prevention model At the same time its thesis has been sharpened by the publication of a companion volume *Approaches to Breast Cancer Prevention* Kluwer 1991 similarly edited byrne Breast cancer is on the increase throughout the Western world where it is a major source of anxiety among women The disease is also becoming more frequent in Asian and South American countries where once it was relatively uncommon Multiple factors are suspected of promoting the disease and the increasing risk is attributed to recent changes in life style and diet This book is intended to provide an authoritative and balanced survey of the latest research into the genetic familial hormonal reproductive nutritional social and geographic factors known

to be associated with an increased predisposition to the disease *Textbook of Cancer Epidemiology* Hans-Olov Adami,David J. Hunter,Pagona Lagiou,Lorelei Mucci,2018-01-09 Comprehensive and comprehensible but also encouraging informed by the hope and belief that informed its creation Cancer Amid sweeping advances in the science and treatment of cancer the TEXTBOOK OF CANCER EPIDEMIOLOGY offers students and professionals a definitive systematic resource for understanding the factors affecting all types of human cancer This fully updated new edition offers an overview of epidemiology s key concepts and methods as they relate to cancer including the emerging potential of biomarkers as well as site specific chapters on individual cancers natural history pathology descriptive epidemiology and etiology Taken together these chapters forge connections between established science and the ongoing evolution of this dynamic field Crisply and concisely written by an assembly of internationally recognized researchers the TEXTBOOK OF CANCER EPIDEMIOLOGY offers a superlative introduction to the subject s consensuses and controversies for those embarking on their careers and a ready reference for seasoned professionals **Textbook of Cancer Epidemiology** Hans-Olov Adami,David Hunter,Dimitrios Trichopoulos,2008-02-27 This superb text gives a concise systematic account of what is currently known about the epidemiology and primary prevention for most forms of human cancer Part 1 provides an introduction to basic concepts in epidemiology a description of the global burden of cancer definitions and characterizations of the various measures used and approaches used to reveal genetic determinants of cancer risk and integrate biologic markers in the epidemiologic research process Part 2 contains chapters of uniform structure on over 20 types of cancer providing clinical and pathological outlines descriptive epidemiology and a comprehensive account of risk factors and their etiological importance Specific sections address somatic and germ cell mutations that play a role in the occurrence of particular forms of cancer

A Quick Guide to Cancer Epidemiology Paolo Boffetta,Stefania Boccia,Carlo La Vecchia,2014-03-22 A Quick Guide to Cancer Epidemiology is an ideal addition to Springer Briefs in Cancer Research The Brief provides core concepts in cancer epidemiology and also gives a snapshot of the epidemiology of seventeen human cancers The Brief aims to provide with quantitative focus estimates of the global burden of neoplasms of recent and likely future trends distribution causes and strategies for prevention for major groups of cancers Finally the Brief will give an overview of several factors that cause cancer including dietary factors tobacco smoking obesity and alcohol consumption Global Epidemiology of Cancer Randall E. Harris,2016 In 28 chapters Global Epidemiology of Cancer provides a basic overview of the most commonly occurring cancers their worldwide incidence and mortality Designed for the health sciences particularly those in epidemiology public health and medicine this comprehensive resource is ideal as a primary text for an overview course or seminar on Cancer or Cancer epidemiology Key Features Backed with research and draws upon worldwide information to address the global landscape of cancer Offers clear concise descriptions of each specific type of oncologic disease as well as its epidemiology etiology risk factors and preventive factors Includes a wealth of information on the pathogenesis of the

disease as we currently understand it at the molecular level

Cancer Epidemiology Jeff M. Leveton, 1977

Cancer Epidemiology and Prevention David Schottenfeld, Joseph F. Fraumeni, 1982 This volume provides the most comprehensive and authoritative account of cancer epidemiology currently available The long awaited Second Edition has been greatly expanded and contains much new material on cancer biology molecular epidemiology preventive strategies and specific types and sites of cancer It represents a systematic updating and expansion of its predecessor while retaining a similar organization No other source contains so much information on risk factors for cancer New chapters describe the emerging methodology and applications of molecular genetics such as the stages in neoplastic development and molecular epidemiology in cancer prevention The epidemiologic reviews of risk factors and causal mechanisms for specific types of cancer include new sections on anus vagina and vulva Among the other new sections is a chapter on the principles and applications of cancer prevention A critical and authoritative review of the complex issues in preventive oncology this book will be invaluable in planning strategic preventive interventions at the community level the workplace the physicians office or the clinic

Cancer Epidemiology Among Asian Americans Anna H. Wu, Daniel O. Stram, 2016-10-14 Cancer Epidemiology in Asian Americans is a comprehensive volume that provides the most current research on cancer etiology within this fast growing population sub group in the United States The book explores epidemiologic methods that are typically used in migrant studies providing descriptive epidemiology of cancer patterns separately in Chinese Japanese Filipino and other Asian ethnic groups including Asian Indians Koreans Vietnamese and other Southeast Asians A major focus of the volume provides reviews of analytic risk factors for specific cancer sites including lung colorectal prostate breast liver and more These chapters aim to explain the increases or decreases in incidence rates of various cancers upon migration paying attention to changing risk factor prevalence the importance of timing of exposures and other co factors important in the etiology of these cancers Genetic determinants and gene environment relationships associated with specific cancers are also discussed This first of its kind volume that is devoted to studies of cancer in Asian Americans provides a foundation to better understanding of environmental and lifestyle causes of cancer in this group identifying gaps in our knowledge and potential strategies for prevention

Schottenfeld and Fraumeni Cancer Epidemiology and Prevention Michael J. Thun, Martha S. Linet, James R. Cerhan, Christopher A. Haiman, David Schottenfeld, 2018 The definitive reference for budding and experienced cancer epidemiologists alike American Journal of Epidemiology Practitioners in epidemiology and oncology will find immense value in this JAMA Since its initial publication in 1982 CANCER EPIDEMIOLOGY AND PREVENTION has served as the premier reference work for students and professionals working to understand the causes and prevention of cancer in humans Now revised for the first time in more than a decade this fourth edition provides a comprehensive summary of the global patterns of cancer incidence and mortality current

understanding of the major causal determinants and a rationale for preventive interventions Special attention is paid to molecular epidemiologic approaches that address the wider role of genetic predisposition and gene environment interactions in cancer etiology and pathogenesis New and timely chapters on environmental and social epidemiologic factors include The role of social class disparities The role of obesity and physical inactivity The potential effects of electromagnetic fields and radiofrequency radiation The principles of cancer chemoprevention For both seasoned professionals and newer generations of students and researchers this fourth edition of CANCER EPIDEMIOLOGY AND PREVENTION remains the authority in the field a work of distinction that every lab library student professional or researcher should have close at hand

Feasibility of Breast Cancer Epidemiology on the Internet, 1997 The revolution in information technology is demonstrated by the dramatic increase in use of the Internet Use of email and the World Wide Web WWW have become commonplace potentially linking tens of millions of people worldwide While the WWW has been embraced as a means for information dissemination its use in an epidemiologic context is in its infancy The survey capabilities of the WWW suggest the possibility of cost efficient data collection from large numbers of people The Epidemiologic Cyberspace Cohort Study is examining the feasibility of enrolling and following participants for a cohort study of diet other factors and breast cancer and other chronic diseases Feasibility will be determined by the number and demographic profile of study participants the stability and use of email addresses for follow up and validity of responses Technical aspects of feasibility include assurance of confidentiality design of user friendly survey forms use of incentives for participation and methods for data capture and tracking of participants ECCSite the website of the Epidemiologic Cyberspace Cohort Study was launched on June 6 1997 URL http://epihub.epi.umn.edu/health_survey/health_survey.htm Through July 30 580 participants had enrolled in the study If feasibility of the WWW for collecting data and for short term follow up is demonstrated this should provide a basis for conducting large timely and cost efficient prospective cohort studies

Cancer Epidemiology in the USA & USSR, 1980 **Cancer Epidemiology** Isabel dos Santos Silva, International Agency for Research on Cancer, 1999 A basic textbook addressed to medical and public health students clinicians health professionals and all others seeking to understand the principles and methods used in cancer epidemiology Written by a prominent epidemiologist and experienced teacher at the London School of Hygiene and Tropical Medicine the text aims to help readers become competent in the use of basic epidemiological tools and capable of exercising critical judgment when assessing results reported by others Throughout the text a lively writing style and numerous illustrative examples often using real research data facilitate an easy understanding of basic concepts and methods Information ranges from an entertaining account of the origins of epidemiology through advice on how to overcome some of the limitations of survival analysis to a checklist of questions to ask when considering sources of bias Although statistical concepts and formulae are presented the emphasis is consistently on the interpretation of the data rather than on the actual calculations The text has 18 chapters The first six introduce the basic principles of epidemiology and statistics Chapters 7 13

deal in more depth with each of the study designs and interpretation of their findings Two chapters concerned with the problems of confounding and study size cover more complex statistical concepts and are included for advanced study A chapter on methodological issues in cancer prevention gives examples of epidemiology s contribution to primary prevention screening and other activities for early detection and tertiary prevention The concluding chapters review the role of cancer registries and discuss practical considerations that should be taken into account in the design planning and conduct of any type of epidemiological research

On Breast Cancer Incidence and Survival Lars Erik Rutqvist,1983 Cancer Epidemiology Amr Soliman,David Schottenfeld,Paolo Boffetta,2013-06-04 According to the World Health Organization s 2008 GLOBOCAN report 64% of global cancer deaths and 56% of cancer cases were registered in countries in Africa Asia or Latin America So while cancer is unquestionably a global burden its reach in the developing world points to the need for specialized study on cancer in these countries Cancer Epidemiology Low and Middle Income Countries and Special Populations reviews the current status of cancer epidemiologic research and training rationale requisite infrastructure methodologic principles and illustrative examples in low and middle income countries in order to facilitate future advances by trained health professionals The result is a valuable resource for both program leaders and graduate and post graduate students pursuing careers in international cancer epidemiologic research Breast Cancer Helmuth Vorherr,1980
