## SAFETY CONSIDERATIONS

Installing and servicing air-conditioning equipment can be hazardous due to system pressure and electrical components. Only trained and qualified service personnel should install or service air-conditioning equipment.

Untrained personnel can perform basic maintenance, such as cleaning and replacing filters. All other operations should be performed by trained service personnel. When working on air-conditioning equipment, observe precautions in literature and on tags and labels attached to unit.

Follow all safety codes. Wear safety glasses and work gloves. Use quenching cloth for brazing operations. Have fire extinguisher available. Read these instructions *thoroughly*. Consult local building codes and National Electrical Code (NEC) for special installation requirements.

## ▲ WARNING

Before installing or servicing system, always turn off main power to system. There may be more than one disconnect switch. Turn off indoor fan coil power if applicable. Electrical shock can cause personal injury.

## GENERAL

The heat pump high wall fan coil units (Fig. 1) come with supplemental electric heat. If your application requires heating, heat pump units must be used, both outdoors and indoors. See Table 1 for recommended system combinations.
