

## Product Data

**58GFA**

### Induced-Combustion Upflow Furnace

Heating Inputs:  
65,000 thru 150,000 Btu/h

#### **78% AFUE With Continuous- Pilot Ignition**

Carrier is the first manufacturer to provide a 78% Annual Fuel Utilization Efficiency (AFUE) gas furnace for the budget-conscious consumer and builder. The 58GFA offers the same high quality you demand from Carrier.

The superior attention to cabinet detail is obvious. The Carrier 58GFA features 1-piece, seamless, wrap-around construction. There are no spot welds on the exterior surfaces of the furnace. There is also double protection for the cabinet. First, a galvanized steel substrate provides resistance to rusting; then the cabinet is constructed of perforated steel — the same high-quality finish found on refrigerators and dishwashers.

The 58GFA offers a proven continuous-pilot ignition system which provides superior reliability.

Carrier's patented Super-S heat exchanger improves heat transfer and enables downsizing of this furnace to only 40-in. tall. It is covered by a 10-year heat exchanger Limited Warranty.

The solid-state control board is the basis of this induced-combustion gas furnace. The control board features a 3-amp fuse which protects the 24-v control transformer.
