

SAFETY RULES CONT'D

When transporting the machine, make use of the safety equipment available, such as the safe coupler, lighting system, and rotating beams. Use these safety devices at the work site as well.

Maintenance

Always lower the bucket, loader, bucket or other mounted attachment to the ground before performing any service operation. If the service being performed requires the bucket or rear mounted attachment to be raised, block that attachment in place first. See Figure 1.

Never grease, oil or perform any maintenance with the engine running unless so instructed in the operator's or service manual. If a bucket must be raised in order to perform the operation, block the bucket in place first.

Never operate the controls unless properly seated in the operator's seat.

Check the parking brake frequently to make sure it is operating properly.

Remember this--the man in the operator's seat is responsible for the safe operation of this machine.
