GS or GT

GSL3 or GTL3

GENERAL

⚠ WARNING

FIRE/EXPLOSION HAZARD: This heater is not intended for use in hazardous atmospheres where flammable vapors, gases, liquids, or other combustible atmospheres are present as defined in the National Electrical Code. Failure to comply can result in explosion or fire.

Chromalox type GS and GT over-the-side immersion heaters are designed primarily for corrosive baths and available in a variety of sheath materials. 316 stainless steel and titanium sheaths are standard.

⚠ WARNING

Sheath corrosion can result in a ground fault which, depending upon the solution being heated, can cause an explosion or fire.

IMPORTANT: It is the responsibility of the purchaser of the heater to make the ultimate choice of sheath material based upon his knowledge of

the chemical composition of the corrosive solution, character of the materials entering the solution, and controls which he maintains on the process. Chromalox cannot warrant any electric immersion heater against failure by sheath corrosion if such failure is the result of operating conditions beyond our control.

1. Heater Construction Characteristics:

- A. High quality resistance wire held in place by ceramic core and magnesium oxide in various sheath materials.
- B. Medium and low watt densities.
- C. Epoxy filled cavity to prevent entry of contaminants.
- D. Over-temperature protection.
- E. Flexible conduit 3' long with 6" leadwire extension.

⚠ WARNING

The system designer is responsible for the safety of this equipment and should install adequate back-up controls and safety devices with their electric heating equipment. Where the consequences of failure could result in personal injury or property damage, back-up controls are essential.
