Early Childhood Education Moncrieff Cochran, Rebecca S. New, 2007-01-30 Early childhood education has reached a level of unprecedented national and international focus. Parents, policy makers and politicians have opinions as well as new questions about what, how, when and where young children should learn. Teachers and program administrators now find curriculum discussions linked to dramatic new understandings about children's early learning and brain development. Early childhood education is also a major topic of concern internationally as social policy analysts point to its role in a nation's future economic outlook. As a groundbreaking contribution to its field, this four-volume handbook discusses key historical and contemporary issues, research, theoretical perspectives, national policies and practices.

Literacy Cate Heroman, Candy Jones, 2004 *Literacy: The Creative Curriculum Approach* shows teachers how to create literacy learning opportunities within the framework of a comprehensive integrated curriculum. This book provides a review of the most up-to-date research about literacy development and thoroughly describes the seven components of literacy in detail: literacy as a source of enjoyment, vocabulary and language, phonological awareness, knowledge of print, letters and words, comprehension and books, and other texts.

House Corner, 1979 Provides criteria to help teachers observe and assess children's level of ability in play and provides suggestions for arranging the house corner area.

Assessment in Emergent Literacy Khara L. Pence, 2007 This handbook provides a practical and useable guide to identifying preschool and early school-aged children's strengths and needs across multiple domains of emergent and early literacy, to include phonological awareness, alphabet knowledge, print awareness, narrative and vocabulary. Specific approaches to assessing and monitoring growth in high-priority areas of literacy are provided. This handbook also provides guidance for evaluating children's learning environments, including supports with the home and classroom.

A Teacher's Guide to Using The Creative Curriculum Developmental Continuum Assessment System Diane Trister Dodge, Laura Jean Colker, Cate Heroman, Teaching Strategies, Inc, 2001

Eliciting Children's Full Potential Sylvia G. Feinburg, Mary Mindess, 1994 *Eliciting Children's Full Potential* is an excellent resource for the recreation of high-quality programs for young children, ages three to eight, that helps readers to develop a deeper understanding of the cognitive developmental model, including how it is like and unlike other child-centered models, and how it links theory with classroom practice. Design and implement programs from a cross-cultural, inclusionary perspective, providing intellectual challenge, stimulating creative thinking, and strengthening children's social cognition and engage in continuous professional growth through a process of positive self and peer evaluation. The book also contains classroom vignettes drawn from a wide range of environments, a system for classroom observation and classroom evaluation instruments.

Student Teaching and Field Experiences Handbook Betty D. Roe, Elinor Parry Ross, 1994 This handbook presents practical, theory-based applications for a full range of teaching concerns, from preparing to teach to computer applications in the classroom. By effectively using vignettes, case studies and activities, this book truly prepares student teachers for teaching children at elementary and secondary levels.
