### **Credit Recovery Pre Calc Final 2020 Answers:**

Pre-budget Report 2008 Great Britain. Parliament. House of Commons. Environmental Audit Committee, 2009 This report examines firstly the Treasury's response to recession The fiscal stimulus measures intended to pull the economy out of recession represent an invaluable opportunity to transform the UK into a low carbon economy But meeting climate change and renewable energy targets will require a step change in environmental investment This year's Pre Budget Report announced a 535m package of green fiscal stimulus measures designed to tackle economic and environmental problems simultaneously This investment is welcome but the scale too small most of this funding was already committed and will be offset by reduced spending in 2010 11 Extra funding announced for the Warm Front programme will not deliver the scale and speed of change that is needed Programmes aimed at improving the energy efficiency of existing buildings should be the number one priority for green fiscal stimulus It is disappointing that the wider fiscal stimulus package contains hundreds of millions of pounds for road building and widening The Treasury should publish an assessment of the net impacts of its fiscal stimulus package on the environment The second part of the report looks at green taxation In real terms revenue from green taxes has gone down slightly since 1998 while revenue from all taxation has increased by around 30 per cent On aviation taxes the Committee criticise the Treasury's backtracking on replacing Air Passenger Duty with a per plane charge and exhorts the Government to seek reform of the Chicago Convention so as to allow taxation of international aviation fuel On motoring taxes it calls for re-examination of the merits and practicalities of a car scrappage scheme to pay people to trade in their existing older cars for newer more efficient models
