Reis Miranda,A. Williams,Ph. Loirat,2012-12-06 Intensive Care Medicine has been continuously growing and expanding culturally technically and geographically Monitoring and instrumentation are continuously improving and more and more hospitals are getting Intensive Care facilities The costs have proportionally increased over the years so that ICUs represent today a major cost for health structures Since the available resources are limited a real need is emerging to set the limits and indications of Intensive Care It is understood that the problem not only involves medical considerations but also ethical and economical aspects of the utmost importance For the first time in Europe this book edited by Reis Miranda and his colleagues tackles systematically the many structural aspects of the European Intensive Care The organisation and financing of health care in the Old Continent is deeply different from the American one and the results and consequent proposals obtained in the USA cannot simply be transferred to this side of the Atlantic Ocean We are extremely pleased to welcome this first European attempt to discuss the Intensive Care problem It lays no claims to giving definite replies in a continuously developing field but it will surely become the basis for future discussions and proposals I am particularly happy that this work has mainly developed within the European Society of Intensive Care whose final target is to ensure a common standard of therapy in our old Europe beyond national differences We warmly congratulate the authors and I am sure that their work will find wide diffusion and consent **The Surgical Critical Care Handbook** Jameel Ali,2016 **Principles and Practice of Critical Care** Verma,2006 The first book of its kind it presents exhaustive lucid and detailed guidelines for managing patients in the ICU It contains clear and concise account of different procedures treatment options available for patients and elaborates the simplest most reliable and cost effective means by which these may be executed In most of the ICUs of our country there are no protocols and things are done haphazardly In these settings such a textbook will serve as a Do it yourself recipe book
