Civil Airliner Flight Guidance Technology for Four-Dimensional Trajectory-Based Operation Guangwen Li, Shaobo Zhai, Qiuling Jia, 2024-09-16 This book focuses on achieving precision guidance and timely arrival in flight. The content comprehensively describes the civil aircraft flight guidance technology for four-dimensional trajectory-based operation. The main content of this book is the summary of the author's team's research work on flight management systems and flight guidance technology over the past decade, including flight plan analysis and transition path construction, four-dimensional trajectory planning and re-planning, high-precision flight guidance commands calculation, FMS landing system, etc. The theoretical methods described in the book have been verified by pre-research and practical engineering projects, which are of great theoretical significance and engineering application value. Factors in Aviation Eduardo Salas, Dan Maurino, 2010-01-30 Fully updated and expanded, the second edition of *Human Factors in Aviation* serves the needs of the widespread aviation community: students, engineers, scientists, pilots, managers, and government personnel. Offering a comprehensive overview, the volume covers topics such as pilot performance, human factors in aircraft design, vehicles and systems, and NextGen issues. The need for an up-to-date, scientifically rigorous overview is underscored by the frequency with which human factors/crew error cause aviation accidents, the pervasiveness of human error in safety breakdowns, technical and communication advances diminishing airspace, and the priority of aviation safety. All contribute to the generation of new human factors problems and the more extensive range of solutions. Now more than ever, a solid foundation from which to begin addressing these issues is needed. New edition thoroughly updated with 50% new material, offering full coverage of NextGen and other modern issues. Liberal use of case examples exposes students to real-world examples of dangers and solutions. Website with study questions and image collection. **Air Transportation** John
