Sir Thomas Longmore

Bones Of Crimea:

Bones of Crimea Phillip Mendenhall, 2014-12-03 Set on the mysterious and volatile Black Sea Bones of Crimea reflects on duality in both time and culture as two stories intersect through a single event in the archaeological record It is the 5th century BC and Khares a weary and stubborn historian from Alexander the Great's expedition to Persia tries to find solace by traveling to the edge of the known world to write about the mysterious native Taurians Twenty five centuries later archaeologists Phillip and his wife Olga return to an excavation at the now ruined Greek colony of Chersonesos The sites tactical location in the past persists to the present day as it is just across a small inlet from the secretive city of Sevastopol home of the Russian and Ukrainian Black Sea fleets Separated by more than 2500 years two explorers unwittingly intersect as a mysterious murder causes war to erupt between two great nations but then surprisingly leads to the prevention of another by its discovery Which leaves only one question just who is responsible
