Borderline Delarosa Secrets Book English Edition:

Borderline T. A. Chase, 2017-05 Surrounded by secrets Mac Guzman and Tanner Wallace search for a serial killer while trying to keep it from becoming personal Books in Print Supplement, 2002 Delarosa Secrets T a Chase, 2015-02-13 Surrounded by secrets two men search for a serial killer while trying to keep it from becoming personal Mac Guzman is a Texas Ranger and lead detective on a serial killer case rocking the city of Houston He s willing to take help from anyone especially when it comes in the form of the gorgeous FBI profiler Tanner Wallace Mixing business with pleasure has never been an option for Mac but he just might change his mind and seduce Tanner into his bed Tanner Wallace joined the Bureau and became a profiler to catch bad guys Also it might have a little do with making up for the evil caused by his family s business When he s called in to consult on a serial killer case in Houston Tanner never expects to meet Mac The handsome Texas Ranger brings to mind hot sweaty nights wrapped in each other s arms yet Tanner knows Mac would walk away if he ever found out who Tanner s family really is With the threat of another murder hanging over their heads Tanner and Mac will have to find a way to work past their differences before the killer strikes again **Borderline Personality Disorder: 30+ Secrets How To Take Back Your Life When Dealing With BPD (A Self Help Guide)** Scott Green, 2015-06-10 Typically borderline personality disorder is defined as a mental health disorder that causes people to have turbulent feelings which result in turbulent actions More often than not these feelings and actions occur over an extended period of time Therefore a diagnosis of borderline personality disorder cannot be made unless an individual has displayed these characteristics for several months to a period of several years In addition most mental health experts avoid making a diagnosis throughout childhood and adolescence because the mind of a child or an adolescent works differently than the mind of an adult It is the general consensus that it is important to wait until a person has reached adulthood thereby allowing the brain to fully develop before a diagnosis can be made with any certainty whatsoever This is done so that mental health professionals can work on the side of caution However it sometimes has rather detrimental effects for the person that is suffering from the disorder because anyone that has been displaying these characteristics earlier in their life is often forced to either go without treatment or be treated for something that they are not suffering from until they finally get a definitive diagnosis This makes it that much more difficult for anyone that is finally diagnosed to get the proper treatment and for the treatment to be effective *Borderline Personality Disorder* The Blokehead, 2014-11-17 Typically borderline personality disorder is defined as a mental health disorder that causes people to have turbulent feelings which result in turbulent actions More often than not these feelings and actions occur over an extended period of time Therefore a diagnosis of borderline personality disorder cannot be made unless an individual has displayed these characteristics for several months to a period of several years In addition most mental health experts avoid making a diagnosis throughout childhood and adolescence because the mind of a child or an adolescent works differently than the mind of an adult It is the general consensus that it is important to wait until

a person has reached adulthood thereby allowing the brain to fully develop before a diagnosis can be made with any certainty whatsoever This is done so that mental health professionals can work on the side of caution However it sometimes has rather detrimental effects for the person that is suffering from the disorder because anyone that has been displaying these characteristics earlier in their life is often forced to either go without treatment or be treated for something that they are not suffering from until they finally get a definitive diagnosis This makes it that much more difficult for anyone that is finally diagnosed to get the proper treatment and for the treatment to be effective
