Christian Logic :

Christian Logic Thomas Childs, 2013-12-10 Christian Logic provides answers for some of life's toughest questions: Why am I here? Is God real? What is God like? What about heaven and hell? How do we deal with hypocritical Christians? And more. This book offers teaching that is relevant and insightful, avoiding empty platitudes that often accompany critical questions about faith and God. It is designed for thinking people who embrace questions raised by science, logic, and critical reflection, yet who also seek answers about God. Without adequate answers, these ideas can seem incompatible. When substantive answers are discovered, you find not only truth that changes how you look at life today, you also find these ideas provide a lifetime of meaning and significance. May this book help you on your journey of finding answers about God that lead to personal transformation.

The Logic of God Ravi Zacharias, 2019-04-02 We all have doubts that challenge our faith. We wonder whether the Bible still matters or whether God is truly as loving and personal as we hope. In his first ever devotional, *The Logic of God*, apologist Ravi Zacharias offers 52 readings that explain how and why Christianity, the Bible, and God are still relevant, vital, and life-changing for us today. To all our dilemmas, Ravi says, I am convinced that Jesus Christ alone uniquely answers the deepest questions of our hearts and minds. With a remarkable grasp of biblical facts and a deep understanding of the questions that trouble our hearts, Ravi tackles the most difficult topics with ease and understanding. But *The Logic of God* is more than intellectual; it is also personal, offering thoughtful wisdom on when Jesus draws especially near you, the deep ray of hope found in God's Word, how God transforms disappointments, why prayer matters, how genuine peace is possible, making sense of suffering. *The Logic of God* is a USA Today and Wall Street Journal bestseller. *The Logic of God* was named the 2020 ECPA Christian Book Award winner for Bible Study category. Ravi makes profound biblical truth easy to understand. And if your life is busy, this book is designed for you. It addresses 52 topics that you can read over the course of one year or slowly digest at your own pace. Each entry includes a scripture, questions for reflection, and some practical application steps. When you're struggling with questions and doubts, confused, curious, or just want a clearer way to express your faith, *The Logic of God* has answers that satisfy the heart and the mind.

Christian Logic Stephen Wuest, 2024-10-25 This text is about fusing logic and moral theory and is definitely from a Christian worldview. It is written on a level for AP high school or at most second-year college use. But the text is for Christian laypeople. The goals of this book include presenting modern deductive logic, modern logical notation, and the twenty rules of inference. These describe what modern deductive logic is. However, orthodox Christians must go further; they must be exposed to historical moral, ethical, and metaphysical models. And they must think carefully about how to integrate Christian morality into modern logic and use this fusion to have a sound methodology to analyze modern arguments. Given the popularity of logically incoherent conspiracy theories, this approach to formal logic enters through the door of what historical Christians would call roughly our shared reality. Also, given the abundance of partial, or invalid, or unsound arguments that Americans encounter, the analysis of arguments in this book will

heavily deal with dysfunctional arguments Putting these topics together in a synthesized way in a Christian worldview results in a product that reasons across disciplines and is perhaps politically incorrect But the author is convinced that this combination of skills is what American Christians need

The Logic of Christianity Stan A. Lindsay, 2018-12-13 A paradigm shift that took hold at the end of the 19th Century in academia effectively shifted the perception of the Bible from the inspired word of God to the verbal creations of various humans Logically based upon this shift in perception and the resultant presumption of human error with which in all candor the author does not agree the book follows a logical progression throughout successive chapters so that readers of the book will be prepared to meet the skeptical audience on its own turf Aristotle called this logical progression approach a syllogistic chain or a chain of syllogisms The 20th Century rhetorical giant Kenneth Burke called such a syllogistic chain syllogistic progressive form What both geniuses are suggesting with these terminologies is that one must build arguments one upon another This approach has certainly been used by philosophers throughout the centuries and millennia Such an approach was used by the father of Modernism Rene DesCartes Faith is a continuum It runs all the way from the tiniest faintest possibility that something is true to the almost certain probability that something is true If we were convinced that there was no possibility that something were true we would have NO faith in it If we were fully 100% certain that something were true we would cease to have faith in that proposition What we know for certain is no longer faith Faith as Aristotle explains it must admit at least two possibilities In his book *On Rhetoric* Aristotle teaches how rhetorical logic works In rhetoric as opposed to dialectic the aim is not to provide absolute truth but only possible or probable truth It applies only to matters of which we cannot be 100% certain Nevertheless although certainty is impossible we can logically conclude that something is probably or possibly true Aristotle says that the goal of this type of logic is to achieve faith If there is no possibility there is no faith If there is only one possibility we call it truth There is still no faith because it is absolute truth The logic of Christianity is a faith based logic Interestingly the Bible says Without faith it is impossible to please God Hebrews 11:6 Dr Lindsay is Teaching Professor of Argumentation Rhetoric and Communication at Florida State University He holds the Master's in Hebrew from Indiana University and the Ph.D. in Rhetoric from Purdue University He is the author of 13 books in addition to *The Logic of Christianity* Some of his other titles are *ArguMentor* *Implicit Rhetoric* *Kenneth Burke's Extension of Aristotle's Concept of Entelechy* *Revelation The Human Drama* *Psychotic Entelechy* *The Dangers of Spiritual Gifts* *Theology The Expanded Kenneth Burke Concordance* *Disneology* *Religious Rhetoric at Walt Disney World* and *The Essence of Rhetoric in Disney Music* Other forthcoming books are *Angels and Demons* *The Personification of Communication* and *Hidden Mickeyisms* *The Implicit Rhetoric of Disney Films* Dr Lindsay has also published in peer reviewed journals and presented at national and international professional conferences of the Society of Biblical Literature

the American Academy of Religion the Kenneth Burke Society the National Communication Association and the Rhetoric Society of America *A Logical Christian* Lloyd Weikamp, 2016-01-27 Wholeness Richard C. Prust, 2021-10-25 The notion of a person is in deep philosophical trouble And this has posed a deepening crisis for believers Christian beliefs are after all irreducibly about persons In response to this situation Prust proposes a new way to reason about persons one based on identifying persons as characters of action Employing a phenomenology of action he calls character logic he develops a powerful new tool for thinking through some of the intractable dilemmas that have long befuddled belief Can we avoid being arbitrary and parochial in claiming that God is the only source of moral value Can we reconcile natural evil in the world with God's absolute power Can we continue to honor the historicity of faith based claims in the face of critical history Can our personal life be eternal when neither timeless nor everlasting life is conceivable Can we accept our personal mortality and still affirm our destiny as eternal Wholeness The Character Logic of Christian Belief argues that character logic shows us a reasonable way to think about persons one that puts theology on a new footing and gives affirmative answers to all these questions **Logic in Orthodox Christian Thinking** Andrew Schumann, 2013-05-02 The Orthodox Christian thought is the most modally rigorous way of inferring The subject of the book is to investigate possibilities of explicating the Orthodox thought from the viewpoint of analytic philosophy and symbolic logic The claim that Orthodox thinking is just mystic and illogical is not true The logical culture of Orthodox Christian thinking is unknown and understandable for the West although its schemata are very influential in Eastern Europe till now Marxism Leninism is just one of their possible instances This thought can be called totalistic or even totalitarian For this thought any truth or falsity is necessary As a result the whole world is presented as logical and nomothetic and there is no place for contingency **A Dictionary of Christian Biography, Literature, Sects and Doctrines: Hermogenes-Myensis** William Smith, Henry Wace, 1882 *The Logic of Non-dogmatic Christianity* William Hurrell Mallock, 1900 **Christianity the Logic of Creation** Henry James, 2019-02-26 This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work was reproduced from the original artifact and remains as true to the original work as possible Therefore you will see the original copyright references library stamps as most of these works have been housed in our most important libraries around the world and other notations in the work This work is in the public domain in the United States of America and possibly other nations Within the United States you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work As a reproduction of a historical artifact this work may contain missing or blurred pages poor pictures errant marks etc Scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public We appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant **A Dictionary of Christian Biography, Literature, Sects and Doctrines** William Smith, Henry Wace, 1882 *Come, Let Us Reason* Norman L.

Geisler, Ronald M. Brooks, 1990-08-01 The perfect introductory textbook this simplified study of logic prepares readers to reason thoughtfully and to spot illogic in an argument

Introduction to Logic Jason Lisle, 2018-11-27 Logic is the study of the principles of correct reasoning That is its definition To be logical is to think rightly and to draw reasonable conclusions from the available information Why does logic matter and who decides what is the right way to think If two people disagree on whether something is reasonable who is correct What is the standard by which we judge a particular line of reasoning to be correct or incorrect In the Christian worldview we can answer these questions because we know that God determines the correct way to reason He is the standard for all truth claims In this book you will learn about logic and the Christian worldview the Biblical basis for the laws of logic if faith is contrary to reason informal logical fallacies and more
