

The Age of Western Imperialism refers to the period between the late 19th and early 20th centuries, during which European powers and the United States expanded their influence and control over territories outside of Europe. This expansion was driven by economic, political, and social factors, including the need for new markets, resources, and strategic military outposts.

- During this time, European powers such as Britain, France, Germany, and Portugal established colonies in Africa and Asia, while the United States expanded its influence in Latin America and the Pacific. Imperial powers imposed their cultural, economic, and political systems on the people they colonized, often resulting in resistance and conflict.
- The exploitation of colonies for their resources, such as raw materials and labor, was a key aspect of imperialism. European powers and the United States created trading systems that favored their own interests and extracted wealth from their colonies. This resulted in the development of the capitalist economy in Europe and North America and the exploitation of colonized territories for their resources and labor.
- One of the most significant impacts of imperialism was the forced displacement and exploitation of millions of people in colonized territories. Many colonized peoples were forced to work in mines, plantations, and other resource extraction operations, leading to widespread poverty and exploitation. In addition, imperialism often resulted in the destruction of local cultures, economies, and political systems, which were replaced by those of the colonizing power.
- Despite its negative impacts, imperialism also had positive effects, such as the spread of Western education, medicine, and technology to colonized territories. Some Western-style systems, such as parliamentary democracy, were also introduced, leading to the development of more democratic systems in some parts of the world.

Islam Vs. West Abubakr Asadulla, 2009 Islam's 1400 year history has made an important contribution to world civilization In its nascent state it miraculously brought the mighty Christian Byzantine and Zoroastrian Persian empires to their knees In the span of a generation the Islamic world became one of the largest empires in history Despite the stereotype of Islam being spread with the sword it was mainly adopted and practiced peacefully Islam recognizes the fundamental importance of the individual's right to religious self determination Islam's aversion to compulsion and its affirmation of the individual's right to choose are clearly stated in the Quran Nevertheless a transformation has occurred in the Muslim world that has led to a decline in Islamic civilization This book summarizes the major historical factors that have contributed to this decline leading to the 9/11 terrorist attacks and proposes a three step process of conflict resolution between Islam and the West Internal problems especially doctrinal struggles were primarily responsible for Islam's downfall In addition disorder and intolerance followed from the devastating conquests by Christian Crusaders and Mongol hordes and more recently from the imperialism and colonization of the eighteenth and nineteenth centuries

Islamic Identity and Development after the Ottomans Özey Mehmet, 2023-03-31 Exploring themes of identity and development in the post Ottoman Arab world this book updates the author's earlier Islamic Identity and Development Routledge 1990 to analyse the root causes of chaos civil war and conflict in the Islamic Core today Adopting a neo Ottomanist framework and using the latest scholarship on the Middle East the author traces the historical development of the current crisis to the First World War when the West instigated invasions coup d'états civil and proxy wars It is argued that Western powers have facilitated the dispossession of the Arab people in their overarching aim to gain control of the oil fields A range of historical case studies are provided as evidence from the Balfour Declaration and the Sykes Picot Agreement to the creation of Israel and the displacement of Islamic refugees Individual nations are also analysed including Iran Saudi Arabia Iraq Syria Libya and Egypt Ultimately the author suggests that artificial countries and unsustainable frontiers are the root causes of the Islamic crisis However a realistic and long term solution may lie in the evolution of a new Silk Route Economy This book will appeal to graduate level students in political economy area studies international affairs and Middle East studies generally
