Chapter 2the Conservative Tide:

More Equal Than Others Godfrey Hodgson, 2009-01-10 During the past quarter century free market capitalism was recognized not merely as a successful system of wealth creation but as the key determinant of the health of political and cultural democracy Now renowned British journalist and historian Godfrey Hodgson takes aim at this popular view in a book that promises to become one of the most important political histories of our time *More Equal Than Others* looks back on twenty five years of what Hodgson calls the conservative ascendancy in America demonstrating how it has come to dominate American politics Hodgson disputes the notion that the rise of conservatism has spread affluence and equality to the American people Quite the contrary he writes the most distinctive feature of American society in the closing years of the twentieth century was its great and growing inequality He argues that the combination of conservative ideology and corporate power and dominance by mass media obsessed with lifestyle and celebrity have caused America to abandon much of what was best in its past In fact he writes income and wealth inequality have become so extreme that America now resembles the class stratified societies of early twentieth century Europe *More Equal Than Others* addresses a broad range of issues with chapters on politics the new economy immigration technology women race and foreign policy among others A fitting sequel to the author's critically acclaimed *America In Our Time* *More Equal Than Others* is not only an outstanding synthesis of history but a trenchant commentary on the state of the American Dream **Barry Goldwater, Distrust in**

Media, and Conservative Identity Rich Shumate, 2021-07-07 The perception that the news media in the United States have a liberal bias is a phenomenon that animates conservatives and affects the ways in which they consider both media content and political discourse Despite professional standards that have been put in place to prevent deliberate bias conservatives would argue that the news media tilt deliberately to the left *Barry Goldwater Distrust in Media and Conservative Identity The Perception of Liberal Bias in the News* explores the origins of this perception of a liberal bias while managing to avoid the highly subjective quagmire of attempting to measure bias by instead positing a social identity explanation for the perception Rich Shumate posits that conservatives need to foster and maintain social identity as conservatives led them to perceive content from elite news media outlets as biased when it did not validate the way they saw the world deeming it hostile and by extension liberal Shumate explores the formation of this perception during the period from 1960-1964 a critical juncture in the American political sphere when conservatives organized to elect Barry Goldwater as president and ultimately came away from the experience bitter with the belief that the news media had stacked the deck against their candidate of choice Scholars of communication media studies journalism political science and American history will find this book particularly useful **McDougal Littell the Americans** Gerald A. Danzer, 1999-07-23 **National History Standards** Linda Symcox, Arie Wilschut, 2009-04-01 As educators in the United States and Europe develop national history standards for K-12 students the question of what to do with national history canons is a subject of growing concern Should national canons still

be the foundation for the teaching of history Do national canons develop citizenship or should they be modified to accommodate the new realities of globalization Or should they even be discarded outright These questions become blurred by the debates over preserving national heritages by so called history wars or culture wars and by debates over which pedagogical frameworks to use These canon and pedagogical debates often overlap creating even more confusion A misconceived skills vs content debate often results Teaching students to think chronologically and historically is not the same as teaching a national heritage or a cosmopolitan outlook But what exactly is the difference Policy makers and opinion leaders often confuse the pedagogical desirability of using a framework for studying history with their own efforts to reaffirm the centrality of national identity rooted in a vision of their nation s history as a way of inculcating citizenship and patriotism These are the issues discussed in this volume Today s students are citizens of the world and must be taught to think in global supranational terms At the same time the traditionalists have a point when they argue that the ideal of the nation state is the cultural glue that has traditionally held society together and that social cohesion depends on creating and inculcating a common national culture in the schools From an educational perspective the problem is how to teach chronological thinking at all How are we to reconcile the social political and intellectual realities of a globalizing world with the continuing need for individuals to function locally as citizens of a nation state who share a common past a common culture and a common political destiny Is it a duty of history education to create a frame of reference and if so what kind of frame of reference should this be How does frame of reference knowledge relate to canonical knowledge and the body of knowledge of history as a whole

Eliminating Human Poverty Santosh Mehrotra, Enrique Delamonica, 2013-07-04 This book focuses on the provision of basic social services in particular access to education health and water supplies as the central building blocks of any human development strategy The authors concentrate on how these basic social services can be financed and delivered more effectively to achieve the internationally agreed Millennium Development Goals Their analysis which departs from the dominant macro economic paradigm deploys the results of broad ranging research they led at UNICEF and UNDP investigating the record on basic social services of some 30 developing countries In seeking to learn from these new data they develop an analytical argument around two potential synergies at the macro level between poverty reduction human development and economic growth and at the micro level between interventions to provide basic social services Policymakers they argue can integrate macro economic and social policy Fiscal monetary and other macro economic policies can be compatible with social sector requirements They make the case that policymakers have more flexibility than is usually presented by orthodox writers and international financial institutions and that if policymakers engaged in alternative macro economic and growth oriented policies this could lead to the expansion of human capabilities and the fulfillment of human rights This book explores some of these policy options The book also argues that more than just additional aid is needed Specific strategic shifts in the areas of aid policy decentralized governance health and education policy and the private public

mix in service provision are a prerequisite to achieve the goals of human development The combination of governance reforms and fiscal and macro economic policies outlined in this book can eliminate human poverty in the span of a generation

Judicial Review of Immigration Detention in the UK, US and EU Justine N Stefanelli, 2020-01-23 Immigration detention is considered by many states to be a necessary tool in the execution of immigration policy Despite the apparently key role it plays in immigration enforcement the law on immigration detention is often vague especially in relation to determining the circumstances under which prolonged detention remains lawful As a result the courts are frequently called upon to adjudicate these matters with scant legal tools at their disposal Though there have been some significant judgments on the legality of detention at the constitutional level the extent to which these judgments have had an impact at the lower end of the judiciary is unclear Indeed it is the lower courts which are tasked with judging the legality of detention through habeas corpus or judicial review proceedings This book examines the way this has occurred in the lower courts of two jurisdictions the UK and the US and contrasts this practice not only in those jurisdictions but with judgments rendered by the Court of Justice of the European Union a constitutional court at the other end of the judicial spectrum whose judgments are applied by courts and tribunals in the EU Member States Although these three jurisdictions use similar tests to evaluate the legality of detention case outcomes significantly differ Many factors contribute to this divergence but key among them is the role that fundamental rights protection plays in each jurisdiction Through a forensic evaluation of 191 judgments this book compares the laws on detention in the UK US and EU and makes recommendations to these jurisdictions for improvement
