**5.0 Introduction**

In the career of a student, there will come a time when he/she may be assigned research topics. Often, such an assignment creates a great deal of anxiety in students which may result in procrastination and feeling of inadequacy. The anxiety often stems from the fact that many students do not have the skill to carry out a research work in a well-ordered manner.

Doing research is one of the fundamental activities in a learning process. Scholars trying to find solutions to existing problems rely on research as a necessary tool for answering complex questions, finding facts, evaluating alternatives and reaching informed conclusions. Research report writing is an essential tool for success in the academic world hence, this chapter is designed to help the students produce acceptable research papers.

**5.1 Research Methodology: An Overview**

In examining the concept of research methodology either descriptively or analytically, two key words - "research" and "methodology" are taken into consideration. On the one hand, research is synonymous with the following terminologies: to seek, to find, to source, to search, to investigate, to inquire, to acquire information with which to improve knowledge. On the other hand, methodology connotes systematic, procedural, technical and an organised way of performing an act. Therefore, research methodologies are systems, procedures and techniques, of searching and sourcing information to improve or alter an existing knowledge.

The search for knowledge is methodological because it follows a system or

**Basic Concepts of Research Methodology: Techniques and Applications** Dr. Subash Chandra Sahu,Asha Elizabeth Jose,Challa Lalitha Navya,Dr. Boda Mahesh Naik,2024-09-11 The Fundamental Ideas Behind Research Methodology Including The Techniques and Applications acts as a resource that is necessary for gaining a grasp of the fundamental concepts and procedures of research methodology The subjects that are covered in this book are quite diverse and include qualitative and quantitative research methodologies sample procedures data gathering tactics and approaches to data analysis Each chapter is intended to assist in the construction of a strong foundation by providing insights into the practical uses of research methodology across a variety of industries An examination of the significance of ethical issues literature reviews and the function of technology in contemporary research procedures will be conducted for the readers This book equips readers with the knowledge and skills necessary to successfully develop and carry out their own research projects by providing them with clear explanations practical examples and hands on activities This comprehensive resource will improve your understanding of research procedures which will eventually contribute to the growth of knowledge and informed decision making Whether you are a student an educator or a professional you will benefit from this resource

*Quantitative and Applied Research Methodology in Economics* Niranjana Devkota,Sushanta Kumar Mahapatra,2025-06-06 This book is an illustrative and comprehensive guide

designed to help readers understand and navigate the complex world of academic writing and research in economics. Written by experienced researchers, this book offers theoretical and practical insights into the research process. It provides an understanding of the foundations of the research process like research design, methodology, problem definition, data collection, and analysis among others. The authors also share insights into the process of preparing proofreading and publishing academic papers. With their experience in the field of academic research, to this book, they provide practical examples and step-by-step guidance to assist in research-related issues. The section on how to prepare and publish academic papers is a must-read for students and early career researchers as it offers valuable guidance on how to succeed in the highly competitive world of academic publishing. With its clear and concise writing, this book will be an indispensable resource for undergraduate and postgraduate economics students, teachers, independent readers, and early career researchers as well as those seeking a deeper understanding of research methodology in economics.

Health Promotion & Education Research Methods Randy Cottrell, James McKenzie, 2011. The main objective in writing a thesis or dissertation is to teach students how to conduct research in a planned and systematic way. Health Promotion Education Research Methods Second Edition provides a comprehensive and thorough presentation of the skills and processes needed to complete high-quality research. Students will receive an overview of the different approaches to research methods and are introduced to the five-chapter thesis or dissertation format. Each chapter contains information relevant to the writing of one or more chapters of a thesis or dissertation.

**Advanced Research Methodology: Innovative Approaches and Applications** Dr. Subash Chandra Sahu, Dr. T. Kumuthavalli, Dr. Sushma R Bankar, Dr. V. Sreedevi, 2024-09-18. Advanced Research Methodology: Innovative Approaches and Applications is a comprehensive guide designed to address the evolving needs of researchers in various disciplines. This book bridges the gap between traditional methodologies and cutting-edge practices, offering a well-rounded perspective on advanced research techniques. The text covers a wide array of topics, including experimental and non-experimental designs, data collection methods, and data analysis techniques. Special emphasis is placed on the integration of technology and innovative tools that enhance research quality and efficiency. Each chapter is meticulously crafted to provide not only theoretical foundations but also practical applications that researchers can implement in their work. Furthermore, this book highlights the importance of ethical considerations, collaboration, and adaptability in research practices. By examining real-world case studies and emerging trends, readers will gain insights into how to effectively address contemporary challenges in research methodology. Ultimately, this book aims to empower researchers with the skills and knowledge necessary to conduct high-quality, impactful research in an increasingly complex world.

**Program scheduling and simulation in an operating system environment** bernard

lampard,2014-02-03 Research Paper postgraduate from the year 2011 in the subject Computer Science Commercial Information Technology grade A Massachusetts Institute of Technology language English abstract CPU scheduling is a technique used by computer operating systems to manage the usage of the computer s central processing unit In a multi programming environment whereby several processes are running on the same processor it is essential to use scheduling criteria to avoid collisions in the computer s operations This will help users in a given information technology oriented firm to share server spaces and resources like printers and file storage spaces In the multi tasking environment a program called CPU scheduler selects one of the ready processes and allocates the processor to it There are a number of occasions when a new process can or must be chosen to run When a running process block and changes its state to Blocked When a timer for a running process expires When a waiting process unblocks and changes its state to Ready and When a running process terminates and changes its state to Exit Wikipedia 2013 Different types of scheduling programs referred to as algorithms can

be employed in CPU scheduling instances Among the most popular scheduling algorithms is Shortest Job First SJF SJF gives the processor to the process with the shortest next time allocation known as the burst If there are processes with similar CPU bursts in the event queue the scheduler uses First Come First Served algorithm which allocates the first process to arrive in the queue to the processor regardless of its burst time It operates under the assumption that the length of the next CPU burst of each of the processes in ready queue is known CPU scheduling 2013 The SJF algorithm can be used in both preemptive and non preemptive methods The algorithm can be preemptive or not Shortest Job First with preemption uses priority measure to determine the next process to be given the CPU The processes will be having different CPU bursts and different priority levels allocated to them The process with the least priority magnitude is always picked next A process already allocated the processor can be preempted the CPU and allocation done to another process with higher priority when such a process arrives in the queue SJF with non preemptive operates in the normal procedure whereby the job with the least CPU burst in the waiting queue is always picked next for allocation of the CPU and the rest of the processes have to wait no matter their urgency Based on the introduction above it is essential to use the right CPU scheduling strategy to help us achieve

Village of Olympia Fields ,2002 **An investigation of the effectiveness of social media marketing on the marketing performance of Selected Higher Education Institutions in Zambia** Francis Mukosa,2022-10-12 Doctoral Thesis Dissertation from the year 2022 in the subject Communications Public Relations Advertising Marketing Social Media grade Pass course Marketing language English abstract HEIs in Zambia have adopted the use of social media in advertising online learning and also for administrative purposes Social media has developed in the recent years to a level where it presents itself as the biggest virtual market with the potential to increase geographic markets and revenue for organizations While cases of HEIs that have used social media marketing for purposes of marketing exist in other places there is no significant research in the Zambian environment that shows empirical evidence that the use of social media marketing can impact marketing performance in HEIs The purpose of this study is to investigate the effectiveness of social media marketing on marketing performance in HEIs and the findings are meant to build a model for social media marketing for HEIs in Zambia in see figure 5 2 in Chapter 5 Data in this research was collected from twelve HEIs using both qualitative and quantitative research methods since this research is a mixed research with both deductive and inductive arguments The data collection techniques included a semi structured interview for qualitative data and a semi structured questionnaire for the quantitative data Data analysis was carried out using different techniques in SPSS for the quantitative data and content analysis using

Google analytics for the qualitative data The implications of the findings in chapter four mean that HEIs in Zambia must begin to use social media not only for administrative or advertising purposes but they must use it effectively as a tool to increase their market share and increase their revenue The findings and data analysis in this research indicated that social media is effective in marketing HEIs in Zambia however these institutions must adopt the suggested model in Figure 5.2 in Chapter 5 if they are to enhance social media performance for marketing

Customers are increasingly becoming active participants and co creators of value in the mobile Internet era With this trend employees are encouraged to engage in active dialogue with customers effectively manage customer diversity and co create personalized experiences Such changes challenge the leadership The relevant literature reveals that the significance to leadership of shared vision has attracted attention and become widely acceptable However there is a large gap in the literature regarding how to model the building of shared vision in service business Our study represents a first attempt to shed light on how vision co creation between leaders and employees can affect the leadership in corporate transformation Based on comparisons of the leadership literature regarding product oriented and service oriented companies we hypothesised about vision co creation with employees Then we conducted an in depth case study in a leading software company in China and interviews in four multinational IT companies in Japan This study suggests that vision co creation with employees is imperative for leaders in today's service dominant business In the co creation process six relevant working states of employees are defined non engagement expectation satisfaction engagement loyalty and creativity As a firm creates a new vision or makes the existing corporate vision into a shared vision it goes through these phases We propose specific implications of the issues and focus on each phase to address the concerns This research makes a contribution by addressing concerns that many companies are over managed and under led Traditional management systems such as management rules PDCA performance appraisals and incentive systems are still indispensable but are not enough to lead employees to work in the high tier state The co creation process makes the new vision come alive so that it can be imagined experienced pursued and worked hard for In the final chapter we provide suggestions for future research The position centred one person leadership described in the previous literature leaves the substantial talents of employees largely untapped

Administration course Master Thesis Project language English abstract This thesis presents a research project entitled A Hypothetical Enhanced Renewable Energy Utilization EREU Model for Electricity Generation in Thailand This research is motivated by Thailand s rapidly increasing electricity consumption caused by the country s long standing above average economic growth Consequently the rising electricity demand can only be satisfied by continuously growing electricity imports and thus creating a significant burden to Thailand s national budget Further more Thailand is heavily dependent on natural gas reserves for electricity generation however these are expected to be depleted within only three decades and global price levels for conventional fuels are increasingly volatile with an ascending tendency as well Therefore Thailand faces an urgent need to strategically plan for the broad utilization of domestic renewable energy resources which is essential for a more diversified and thus sustainable electricity generation as well as for the nation s endeavor to become an energy hub within the South East Asian region Under these circumstances this research conducts a comprehensive literature review regarding the past development as well as the current situation of renewable energy utilization in Thailand which concludes in the identification of the importance of renewable energy in the given context and closes with both a distinctive need assessment and a conceptual framework for Thailand s future renewable energy strategy Subsequently the research introduces a unique primary research endeavor in the form of an explorative expert interview survey which succeeds in a substantial collection of qualitative and in depth data These valuable data is first objectively analyzed and second subjectively interpreted and summarized to become the major source for the derivation of a multitude of potential strategic recommendations for an enhanced future renewable energy utilization development in Thailand Finally the entirety of theses recommended strategic approaches based on both the secondary and primary research are assembled to develop the Enhanced Renewable Energy Utilization EREU model for electricity generation in Thailand as the fundamental finding of this thesis and research project respectively
