

LOCATION OF SERIAL AND PRODUCT IDENTIFICATION NUMBERS

An example of a P.I.N. number is DAC0202001. The first five digits, "DAC02", identify the manufacturing source and are common to all 9020B Excavators; the fifth digit, "2", identifies the model size; 9020B; the sixth digit, "0 or 1", identifies each of the two variations of the 9020B Excavator and are coded as follows:

DAC020 - Standard model

DAC021 - SA (Special Application model)

DAC02# - All models

Features a standard machine without boom, arm or bucket.

Used on catalog text pages only, to indicate a common application for both model variations as coded above.

The # symbol never appears on the machine.

The last four digits (like 2001 in the example above), establish the manufacturing sequence of the machines. These numbers are recorded, as component designs change, to provide correct part replacement. For instance, all 9020B Excavators, P.I.N. 2001 and after, are Federal Emission Certified Machines. Please use the horizontal lines provided below to record your Excavator's Engine Serial Number and Product Identification Number.
