Chapter 2 things To Know Webs:

Learn Java for Web Development Vishal Layka, 2014-03-05 Web development is still one of today's most popular active and important programming and development activities. From a single web page to an e-commerce enabled web site to a fully fledged web application, the Java programming language and its frameworks allow you great flexibility and productivity for your web application development. Learn Java for Web Development teaches web developers who are new to Java key skills: Java-based languages and frameworks to build simple or complex web sites and applications. As soon as you pick up this book, Vishal Layka's experience guides you on a very practical learning and building journey. You will learn the Java nuts and bolts necessary to build a simple HelloWorld Java native application as well as a HelloWorld Java-based web application example that utilizes servlets and Java Server Pages (JSPs). Over the course of the book, you'll learn more about servlets and JSPs and delve into Java Server Faces (JSFs) and the expression language found in each of these by applying them in a real-world case study: a book store e-commerce application. Then you'll build your web application using Apache Struts2 and the Spring MVC framework. The book concludes by exploring the web application that you've built and examining industry best practices and how these might fit with your application as well as covering alternative Java Web frameworks like Groovy, Grails, and Scala Play 2. You also can explore the basics of Java, Groovy, and Scala in the book's appendices. While reading this book, you'll see all this in action and you can use it as a starting point for further Java web development. Study and experiment with the many source code examples and later apply them to your own web application building endeavors and 2:00 AM challenges.

Using Web Analytics in the Library Kate Marek, 2011-12 Libraries are delivering an ever-increasing proportion of their services through the web, a trend that seems certain to continue. In order to guide purchases and appropriately distribute services and staff time, it's essential that libraries and librarians accurately track the usage of their websites and online resources. *Managing and Organizations* Stewart R.
