Topic: History | Words: 1212 | Pages: 4

The Cold War is defined as an open though restricted rivalry between the Soviet Union, the United States, and their allies. Although it developed after World War II, the roots of The Cold War were in Western allies' repeated delays in providing help and opening a European second front. The Russians' concerns related to allies' genuine motives were increased by the refusal of the United States to continue lend-lease aid after the war. In response, Stalin broke his commitment to free elections in the countries of Eastern Europe, installing Communist-dominated governments in Romania, Poland, and Bulgaria in 1945. Thus, the Soviet Union's expansion of communism across the globe was regarded as a threat to democratic nations. It led to direct confrontations over Germany in 1948, the formation of the North Atlantic Treaty Organization (NATO), the end of the Western monopoly on nuclear weapons due to the Soviet Union's first atomic warhead, both in 1949, and confrontation between countries on other territories that led to war, including wars in Vietnam and between South and North Korea that caused the division of two states and their functioning on the basis of opposite ideologies.

At the same time, American foreign policy in the immediate postwar years and through the 1950s targeted both the protection of the world against the Russians' aggression and the establishment of its global dominance. Muslims' Perceptions of the Bush Doctrine Masoud Bonyanian, 2009 This book is an investigation of Muslims perceptions of Islamic Fundamentalism and of the United States foreign policy It specifically deals with the impact of the Bush Doctrine and examines how this doctrine served as a social political mechanism for mobilizing many Muslims The book offers guidance in how to end an era of distrust and discord between the Muslim and the Western worlds Torn Between America and China Daniel Novotny, 2010 How can a developing democratic and predominantly Muslim country like Indonesia manage its foreign relations while facing a myriad of security concerns and dilemmas in the increasingly complex post Cold War international politics without compromising its national interests and sacrificing its independence Approaching this problem from the vantage point of the Indonesian foreign policy elite this book explores the elite's perceptions about other states and the manner in which these shape the decision making process and determine policy outcomes The combined qualitative and quantitative research strategy draws on a unique series of in depth interviews with 45 members of the Indonesian foreign policy elite that included the country's present and or former presidents cabinet ministers high ranking military officers and senior diplomats Among all state actors Indonesian relations with the United States and China are the highest concern of the elite The leaders believe that in the future Indonesia will increasingly have to manoeuvre between the two rival powers While the United States during George W Bush's presidency was seen as the main security threat to Indonesia China is considered the main malign factor in the long run with power capabilities that need to be constrained and counter balanced **The Committee to Destroy the World** Michael E. Lewitt, 2016-03-15 An updated examination of what's weakening the U S economy and how to fix it The Committee to Destroy the World Inside the Plot to Unleash a Super Crash on the Global Economy is a passionate and informed analysis of the struggling global economy In this masterfully conceived and executed work Michael Lewitt one of Wall Street's most respected market strategists and money managers updates his groundbreaking examination of the causes of the 2008 crisis and argues that economic and geopolitical conditions are even more unstable today His analysis arrives in time for the impending economic and geopolitical debates of the 2016 election season Lewitt explains in detail how debt has now overrun the world's capacity how federal policies of the past few decades have created a downward vortex sapping growth and vitality from the American economy and how greed and corruption are preventing reform The financial crisis created tens of trillions of debt leaving investors to pay a huge price for these policy failures The highest asset inflation we've seen in our lifetimes although the government claims there isn't enough inflation More than 2 trillion of stock buybacks funded with low cost debt that are artificially inflating stock prices The Federal Reserve and other global central banks becoming the largest buyers of government debt in order to suppress interest rates An M A boom resulting from companies needing to find growth outside of their core businesses While the financial media misses the story Lewitt pulls no punches explaining how all of these trends are leading to the brink of another crisis Lewitt

lays out a survival plan for the average investor to protect their assets when the debt bubble bursts The first edition of this book expressed hope that policymakers would not let the financial crisis go to waste This book urges investors to learn from the crushed hope and take action before the next crisis
