Psychology and the Real World FABBS Foundation, 2009-12-29 Psychology and the Real World: Essays Illustrating Fundamental Contributions to Society is a collection of brief personal original essays ranging in length from 2500 to 3500 words in which leading academic psychologists describe what their area of research has contributed to society. The authors are true stars in the field of psychology. Some of their work, for example Elizabeth Loftus's studies of false memories, Paul Ekman's research on facial expression, and Eliot Aronson's jigsaw or cooperative classroom studies, is well known to the public. The research of others is less familiar to nonspecialists but no less fascinating. The book is unique: the world of textbook ancillaries in that it does not reprint writings. Rather, innovative psychological scientists clearly and entertainingly tell readers why their research matters and how their line of inquiry developed. The concept for the book came from the FABBS Foundation, a nonprofit educational foundation that supports the work of 22 scholarly societies that span the cognitive, psychological, behavioral, and brain sciences. The authors have volunteered their contributions. These authors have agreed that all grants, advances, and royalties and other financial earnings from this volume will go to the FABBS Foundation to support their educational mission. *Aging and Older Adulthood* Joan T. Erber, 2013-01-29 The third edition of this essential text has been updated and expanded with new material that reflects the most recent developments in the field and explores our current understanding of a broad range of topics related to aging and older adulthood. Fresh edition includes updated content such as revised case histories and reworked material on key concepts and research applications. Retains the winning format of the second edition with chapter contents framed by individual histories. Dual models add cohesiveness to the presentation of theory. Thematic structure facilitates reader comprehension.
