**Nature-Based Solutions and the Sustainable Development Goals: Strategies for Climate Action, Biodiversity, and Resilient Communities** Robert C. Brears, Nature Based Solutions and the Sustainable Development Goals is your essential guide to using nature based solutions NbS to achieve sustainability targets across climate action biodiversity and resilient development This comprehensive resource explores how NbS help address climate change restore ecosystems improve water security and build sustainable urban and rural communities Discover how natural systems can drive progress on the Sustainable Development Goals SDGs by enhancing resilience supporting biodiversity and enabling circular economy practices Inside you will learn how to Implement nature based climate solutions for SDG 13 Climate Action Restore ecosystems for SDG 15 Life on Land and SDG 6 Water Security Apply NbS in urban planning agriculture and circular economy transitions Navigate the economic and social

benefits of NbS from green jobs to health equity Integrate NbS into policy frameworks and sustainable development strategies Perfect for policymakers sustainability professionals researchers and urban planners this book bridges science policy and practice to provide actionable strategies for implementing NbS at scale If you re ready to drive climate resilience biodiversity conservation and sustainable development through nature based solutions this book gives you the tools to lead the transition *Corporate Biodiversity Management for Sustainable Growth* Ravi Sharma,Aparna Watve,Amitabh

Pandey,2020-05-11 This book aims to cover the multitude of corporate approaches towards mainstreaming biodiversity conservation and ecological management in policies and action plans and explores the roles of these efforts in achieving national and global targets for the Sustainable Development Goals SDGs The book addresses various aspects of corporate actions such as corporate environmental responsibility green businesses market based approaches to biodiversity conservation and biodiversity trade offs and includes concept papers reviews and case studies presenting qualitative and quantitative research Additionally the text compares and assesses examples of positive and negative impacts of corporate involvement in biodiversity conservation in developed and developing countries to identify innovative approaches and the best practices and models that can be replicated in diverse environmental conditions The studies included in the book will help those working in the field of corporate involvement in biodiversity conservation and outline the strengths and weaknesses of the approaches which will be useful for designing new environmental management action plans in the face of climate change The book will also be of great value to researchers academicians policy makers civil society groups policy think tanks and conservation managers **Agricultural Biodiversity and Biotechnology in Economic Development**

Joseph Cooper,Leslie Lipper,David Zilberman,2006-05-27 The topics addressed in this book are of vital importance to the survival of humankind Agricultural biodiversity encompassing genetic diversity as well as human knowledge is the base upon which agricultural production has been built and protecting this resource is critical to ensuring the capacity of current and future generations to adapt to unforeseen challenges Agricultural biodiversity underpins the productivity of all agricultural systems and is particularly important for poor and food insecure farmers who maintain highly diverse production systems in response to the marginal and risky production conditions they operate under Understanding the importance of agricultural biodiversity in the livelihoods of the food insecure and enhancing its performance through the use of a variety of tools including biotechnology is a critically important issue in the world today where over 800 million people have insufficient food to meet minimum needs A strong theme that runs throughout the book is the importance of good public policy interventions to promote the provision of public goods associated with agricultural biodiversity conservation and directing biotechnology development to meet the needs of the poor The book s primary innovation is that it describes the relationship between biotechnology and plant genetic diversity and puts these in the context of agricultural development Both the conservation of plant genetic diversity and agricultural biotechnology have received extensive examination but the linkages between the two

have not despite the apparently obvious relationship between the two **Global Action for Biodiversity** Timothy Swanson, 2013-11-19 At the Rio Earth Summit in 1992 the nations of the world adopted the convention on Biological Diversity Since then over 160 countries have ratified the Convention three Conferences of the Parties have taken place and a permanent secretariat has been established Despite this there remains a lot of uncertainty and even more controversy about what the Convention was intended to accomplish and how it was to do so This book published in association with the IUCN The World Conservation Union sets out to answer some of these questions by recounting the history of the movements leading up to the Convention but especially by analysing the forces giving rise to the problem It provides a specific set of policy prescriptions intended to facilitate the development of institutions and obligations within the international community which will give real effect to the aspirations of the Convention and the ensure that it has some real effect at ground level The author begins with an overview of the issues and then develops the basic nature of the problems within a bio economic framework He highlights the gaps in the Convention which remain to be filled offers detailed explanations of the concepts involved and describes the nature of the solutions required Thus he sets out a detailed plan for global action in support of an effective international convention for the conservation of biological diversity The book is an excellent introduction to a very topical debate and a valuable reference point for conservationists policy makers and students of development studies environmental studies environmental policy and conservation biology

**Nature-based Solutions for Urban Resilience and Human Health** Bo Hong, Bin Jiang, Henrik Vejre, 2024-05-03 Climate change and rapid urbanization have significant impacts on biodiversity and ecosystem functions and services Nature based solutions NBS is an action to work with and enhance nature to solve social challenges and NBS is an umbrella concept for other mature nature based approaches Blue green spaces BGS can provide a wide range of ecosystem services including mitigation of urban heat island effects reduction of flooding mitigation of air pollution and provision of recreational spaces thereby promoting physical and mental health Hence NBSs can serve as cost effective climate mitigation and adaptation tool that contribute to additional co benefits for ecosystem health and human well being Environmentalists epidemiologists ecologists urban planners and policymakers have paid more attention to NBSs for urban resilience and human health In this Research Topic we hope to discuss these topics 1 ecological exposure and health benefits 2 climate adaptation and human health promotion possibilities by NBSs 3 methodological and theoretical approaches as well as technologies of NBSs corresponding to urban resilience 4 underlying pathways and potential mechanisms of NBSs in improving human health and 5 policies and management for planning and design of the successful implementation of NBSs in relation to urban resilience and human health This Research Topic focuses on but is not restricted to the following issues Nature based interventions for climate adaptation Ecological exposure and physical and psychological health outcomes Climate adaption environmental policies and management Theoretical and case based studies on climate mitigation and adaption by NBSs Ecosystem service perspective on promoting urban resilience
