Berlina 2005 Repair Manual:

Construction Materials Manual Manfred Hegger, Volker Auch-Schwelk, Matthias Fuchs, Thorsten Rosenkranz, 2013-02-12
Until now the few existing systematic texts on construction materials have primarily been directed at building engineers An overview for architects which also considers the importance of construction materials in the sensory perception of architecture including tactile qualities smell color and surface structure has not been available With the publication of the *Construction Materials Manual* all that has changed As a basic work aimed equally at the questions and perspectives of architects and building engineers it will bring together all of the above mentioned viewpoints It addresses fundamental questions of sustainability including life span environmental impact and material cycles while also presenting material innovations All of the principal conventional and innovative construction materials are comprehensively documented with attention to their production manufacture fabrication treatment surfaces connections and characteristics International examples help to illustrate their use in architecture where a building s appearance is often defined by a single material Thus the *Construction Materials Manual* will support the daily work of architects and engineers in the choice of construction materials in a comprehensive and at the same time vivid and stimulating manner
