Cooperation Between Established Firms and Startups in Order to Address Technological Discontinuities

Tobias Gebhardt, 2015-04-22 Master's Thesis from the year 2014 in the subject Business economics Company formation Business Plans grade 2/3 University of Southern Denmark Department of Marketing Management course Management of Innovation Processes language English abstract Technological discontinuities have been characterizing many markets for several years. Essential drivers for that are the Internet and startups which make use of this technology in order to create new business models. This progress is quite often challenging established firms and call for them to leave their comfort zone. In contradiction to this competitive perspective this paper aims to highlight the synergies between companies that have already been operating for many years and new market entrants. By doing so it is examined how both may interact with the aim of commercializing products and sustaining innovation. Thereby corporate incubators, corporate venture capitalists and non equity relationships between established firms and startups are considered as forms of cooperation. In addition to that and by using the data of a conducted survey insights into the experiences and expectations of incumbents and startups will be also provided. Following this managerial implications shall serve as a base for future cooperation and the management of technological discontinuities.

Transmission Channels of Financial Shocks to Stock, Bond, and Asset-Backed Markets Massimo Guidolin, Viola Fabbri, Manuela Pedio, 2015-11-12 Researchers, policymakers and commentators have long debated the patterns through which adverse shocks in a few markets may quickly spread to a range of apparently disconnected financial markets causing widespread losses and turmoil. This book uses modern linear and non linear econometric methods to characterize how shocks to the yield of risky fixed income securities such as sub prime asset backed or low credit rating sovereign bonds are transmitted to the yields in other markets. These include equity and corporate bond markets as well as relatively risk free fixed income securities such as highly rated asset backed securities and sovereign bonds from core Eurozone countries. The authors analyse and compare the results from linear and non linear models to identify and assess four distinct contagion channels characterizing both US and European financial markets. These include the correlated information risk premium flight to liquidity and flight to quality channels. The results of this study support the theory that both investors and policy makers ought to pay special attention to liquidity and commonalities in the perceptions of the probabilities of default as channels through which financial shocks propagate.

International Project Management. A Theoretical Analysis and Pragmatic Application of a London Start-up Company

Johannes Michl, 2015-06-18 Seminar paper from the year 2014 in the subject Business economics Company formation Business Plans grade 1.0 University of Applied Sciences Deggendorf language English abstract The goal of this paper is to evaluate international project management at XY and to make recommendations for a better project cooperation. Therefore, first the typical project management approach at this company is examined. In a second step, problems and weaknesses of the process are identified to present in a third step possible solutions. This paper, the project management approach of XY is described from the perspective of the author. For a higher degree of detail, one would have to question more employees of the company who participated in projects. Moreover, when having a look at the cultures, not all of the cultures that are found at XY are considered because that would exceed the scope of the paper. Certain cultures are selected to make a point clear. Lastly, it also was not tested whether or not the recommendations are practical. In chapter two, the company XY is briefly introduced. A larger version of the organizational chart of the firm can be found in the appendix A. The subsequent third chapter presents the current project management approach at XY. This process is divided into project initiation, project planning, action, and control, and finishing the project. The fourth chapter points out problems related to the project management approach and additional cultural and language-specific problems. The cultural indexes which help to categorize the cultures can be found in the appendix. The recommendations for improvement are described in chapter five. The paper is completed in chapter six with a conclusion. For the preparation of this paper, primarily textbooks were used which can be found in the appendix listed alphabetically. More knowledge was obtained from websites. Lastly, the experiences of the author at a six-month internship at XY were essential to describe it. **The Attributes of the Cultural Entrepreneur**

Nick Birch, 2014-08-27 Essay from the year 2014 in the subject Business economics Company formation Business Plans grade 1.6 Central Queensland University course Cultural Entrepreneurship language English abstract For generations, Zen philosophy has taught the importance of finding tranquillity inside yourself instead of foolishly seeking it in the world around you. One of the most profound teachings from this philosophy and probably one that is most relevant to the entrepreneur is that of ignoring doctrine and listening to your gut instinct. Butt (2014a) Google N.A. defines entrepreneur as a person who organizes and operates a business or businesses taking on greater than normal financial risks in order to do so from the French *entreprendre* meaning to undertake and go between. Branagan (2003) outlines several critical success factors: being able to make connections and spot

opportunity taking a creative approach to problem solving being able to cultivate networks of appropriate contacts being able to persuade inspire and motivate others through enhanced vision the ability to take calculated risks and having the nerve to work outside convention the ability to overcome rejection and failure keeping pace with technology and innovation an understanding of business strategies and tactics It is the spirit of undertaking something novel and innovative in some sense either pushing forward with avant garde activities or combining elements from previous concepts for new markets or audiences There are many entrepreneurs within the arts world who do just this acting as go betweens for artists and clients or audiences Furthermore the common preoccupation with originality implementing ideas and making progress held by many artists and arts consultants is itself an entrepreneurial trait translating vision into a creative act From a contemporary and historical perspective an entrepreneurial outlook has either inadvertently or intentionally ensured the successful progression of many very influential figures within both the commercial and non commercial arts sectors Branagan 2003 **Small**

InsurTech startups that entered the market in this observation period In line with prior research the evidence suggests that startup entrance has a curvilinear effect on incumbents innovativeness Therewith this study finds that the inverted U relationship between competition and innovation holds also when considering startup entry Lastly the findings suggest that the positive effect of startup entry is stronger for younger incumbents In conclusion an extensive understanding of the given relationship between startup entry and incumbents innovativeness is crucial for practitioners in order to further shift their mindset to a more proactive innovation behavior The field of innovation is important for both practitioners and scholars The Boston Consulting Group s annual global survey of the state of innovation supports the importance of innovation as 79 percent of the respondents ranked innovation as a top three priority for their company Especially in industries with rising competition innovation is considered a crucial activity in order to distinguish oneself from competition Still evidence found in literature is contradictory as not all economic theories follow this positive competition innovation relationship For example Schumpeter 1942 as well as Dixit and Stiglitz 1977 and Salop 1977 with their theories of industrial organization suggest that with rising competition innovation should decline International Management Analysis of ALDI Kathrin

Cloud Computing Business in Saudi Arabia Nicholas Guantai, 2014-07-14 Doctoral Thesis Dissertation from the year 2014 in the subject Computer Science Commercial Information Technology grade 4 5 Egerton University language English abstract Cloud computing has 3 primary service models including SaaS IaaS and PaaS which are classified depending on the level for which a service user interacts with the service provider s systems in accessing memory processing power and storage Deployment models of cloud computing include hybrid community public and private clouds depending on the approach to hosting and the number of clients sharing a resource Due to the prohibitive nature of private cloud computing and requirement for specialized systems in community clouds the most suitable approach to cloud computing for small and medium enterprises is public cloud computing In this regard this study was aimed at determining the extent to which implementation of public cloud computing by enterprise companies is feasible Due to the cultural and the absence of law in Saudi Arabia ensuring the protection of data in the cloud challenges in implementing cloud computing in the country are related to adherence to the data governance structure For instance privacy and security are important for enterprise companies since the local culture values the safeguarding of family and individual information In addition information transferred through the cloud system must adhere to the conservative philosophy and data privacy which limits the level of compatibility in cloud computing between Saudi Arabia and the western world Since most service providers are based in the west companies have to identify a service provider that tailors its products to suit the market in Saudi Arabia Therefore implementation of public cloud computing in Saudi Arabia is feasible as long as companies select a service provider with a positive reputation limit posting of sensitive information to the cloud server and implement cloud computing gradually to avert the possibility of complete failure This study determined that SaaS cloud computing is feasible for enterprise companies in Saudi Arabia but further study is required to examine the feasibility of IaaS and PaaS In addition a larger study should be done to collect quantitative data to determine the implications of cloud computing in a representative sample
