A Greek and English Lexicon to the New Testament John Parkhurst, 1813 **Remembrance of Things Past: The sweet cheat gone** Marcel Proust, 1929 **Socrates** Ann Ward, 2009-03-26 Socrates is widely regarded as the first philosopher to investigate not simply the natural world but to make human and political questions concerning justice virtue and the good life central to rational inquiry Thus Socratic philosophy is often viewed as taking a rationalist approach to human narratives and becomes a narrative itself After Socrates the prevailing view of what defines the Greeks and those commonly regarded as their descendents the Europeans is their civilizational foundation in philosophic rationalism The Socratic conception of Greek and European identity has not gone unchallenged however In antiquity the comic poet Aristophanes lampooned Socrates as impious and unjust and cast doubt on whether the Socratic way of life was an appropriate basis for politics Examples from more recent times include the ambiguous place that Socratic philosophizing holds in the philosophies of Hegel Kierkegaard and Nietzsche The re assessment of Socratic rationalism in the 19th century has led to a post modern suspicion of grand narratives The radical critique of Socrates as the remote but powerful source of the priority assigned to reason in the 17th and 18th century Enlightenment s has shaken European faith in scientific social and political progress The European mind is left longing for a unifying narrative that crystallizes the European identity Can Socratic philosophy survive the powerful challenges made in the name of history faith and art Does Socratic philosophizing adequately sustain political life in the face of such challenges and does it prioritize reason over other human ways of knowing and representing their world Alternatively do the positions of later thinkers offer superior ways to understand the human person and develop political communities This volume addresses these and related questions as it seeks to recover and revise our understanding of Socratic philosophy as an appropriate paradigm for European identity It takes an interdisciplinary and international approach with contributions from scholars in the fields of philosophy classics religion English and political science The contributors teach and research in Europe Canada the United States and Iran Plato's Republic Platon, 1894

Plato's Socratic Conversation Michael C. Stokes, 1986 This study focuses on Laches Protagoras and the conversation between Socrates and Agathon in the Symposium For these dialogues the author proposes a strategy of interpretation that insists on the dialogues essentially interrogatory character Stokes argues that we are not entitled to ascribe a thesis to Socrates far less to Plato unless he unambiguously asserts it as his own belief For the most part Stokes argues Socrates is doing what he claims to be doing cross examining his interlocutor He draws the materials of his own argument from the respondent s explicit admissions and from his own knowledge of the respondent s character commitments and ways of life What is shown by such a procedure is not according to Stokes that a certain thesis is true or false but rather that a certain sort of person with certain commitments can be led on pain of inconsistency to assent to theses that at first seem alien to him Sometimes as it turns out these are theses that Socrates also endorses in his own person Times Literary Supplement

The World Is Around You, But You Are in Your Car William M. Trently, 2009-05 The World is Around You but You are in Your Car is a work of fiction wrapped around an essay that describes an American problem the relentless pursuit of the perfect life and its negative consequences that adversely affect progress and behavior toward the rest of the world I want it and I want it now with its shortage of self restraint has been taken to levels not reached before and the insidious ramifications are eye opening the easy disposability of people or principles if these should obstruct the path to the perfect life the mental depression from the strains of struggling to keep up with neighbors or the isolation from reality as people become more and more comfortable in their plush living rooms and cars The tale brings history's great philosophers together to sound an alarm and talk about ways to slow the relentless pursuit They have already debated the relevant issues with each other here in this story their role is only to inform us of their conclusions They discuss the external and internal controls that restrain the pursuit agreeing that internal control involving individual self regulation is more effective and desired than external control primarily because of its greater conduciveness to freedom the crown jewel of this civilization **American Movie Critics** Phillip Lopate, 2006 This collection provides not only dozens of close ups of iconic movies but also a panorama of modern times Dust jacket *Reading* Belinda Jack, 2019-04-08 Today many people take reading for granted but we remain some way off from attaining literacy for the global human population And whilst we think we know what reading is it remains in many ways a mysterious process or set of processes The effects of reading are myriad it can be informative distracting moving erotically arousing politically motivating spiritual and much much more At different times and in different

places reading means different things In this Very Short Introduction Belinda Jack explores the fascinating history of literacy and the opportunities reading opens For much of human history reading was the preserve of the elite and most reading meant being read to Innovations in printing paper making and transport combined with the rise of public education from the late eighteenth century on brought a dramatic rise in literacy in many parts of the world Established links between a nation s levels of literacy and its economy led to the promotion of reading for political ends But equally reading has been associated with subversive ideas leading to censorship through multiple channels denying access to education controlling publishing destroying libraries and even the burning of authors and their works Indeed the works of Voltaire were so often burned that an enterprising Parisian publisher produced a fire proof edition decorated with a phoenix But as Jack demonstrates reading is a collaborative act between an author and a reader and one which can never be wholly controlled Telling the story of reading from the ancient world to digital reading and restrictions today Belinda Jack explores why it is such an important aspect of our society ABOUT THE SERIES The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area These pocket sized books are the perfect way to get ahead in a new subject quickly Our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable
