

Check Engine Light

The "Check Engine Light" (also known as the Malfunction Indicator Lamp) is a warning light that illuminates when the engine control module (ECM) detects a problem with the engine or emissions system. The light can be triggered by a variety of issues, including:

Emission Leak

Emissions can leak for various reasons. There might be a hose or sealing issue, which the engine module detects and triggers a warning.

1

Lean Codes

Various issues related to the engine can trigger lean codes (trouble codes). These codes help the mechanic determine the problem's cause.

2

4

Engine Misfire

Engine misfires happen when there's a combustion issue, spark, or fuel problem. The misfire is like a "jolt" sensation from the engine, and it should trigger the warning light.

3

Catalytic Converter

The catalytic converter works with the engine to help with emissions. If the catalytic fails, it'll trigger a "check engine" light.
