"The research team is finally doing research on the early stages of working from conditions, but we haven't seen much of it," says Haines. "For the purpose of the book, I had to rely on what I could find in the literature. I found that the research is still very much in the early stages, and it's not clear what the best practices are. I think that's why it's so important to have a book that can help people understand the early stages of working from conditions, and that's why I wrote this book."

By 1990, the first year of the study, 100% of the 1000 children had been vaccinated against measles.
