

Create a charge

To charge a credit card or other payment source, you create a `Charge` object. If your API key is in test mode, the supplied payment source (e.g., `card`) won't actually be charged, although everything else will occur as if in live mode. (Stripe assumes that the charge would have completed successfully.)

Abstract

amount A positive integer representing how much to charge, in the smallest currency unit (e.g., `100` refers to charge \$1.00, or `100` to charge ¥100, a two-decimal currency). The minimum amount is \$0.50 USD or equivalent in charge currency.

currency Three-letter ISO currency code, in lowercase. Must be a supported currency.

<code>application_fee</code>	A fee in cents that will be applied to the charge and transferred to the application owner's Stripe account. The request must be made with an <code>OAuth</code> key or the Stripe Account header in order to take an application fee. For more information, see the application fee documentation .
